

## 22.04. Schedules and periods

### Schedules and periods

**Schedules** are regular timeframes (e.g. monthly, fortnightly) that may be used for cyclical operations, such as program orders (special types of requisitions). There is no limit to the number of schedules.

**Periods** are specific timeframes which exist *within* schedules. Periods have a distinct start and end date. They must be sequential and must not have any overlapping dates or gaps between periods.

### Permission to add/edit schedules and periods

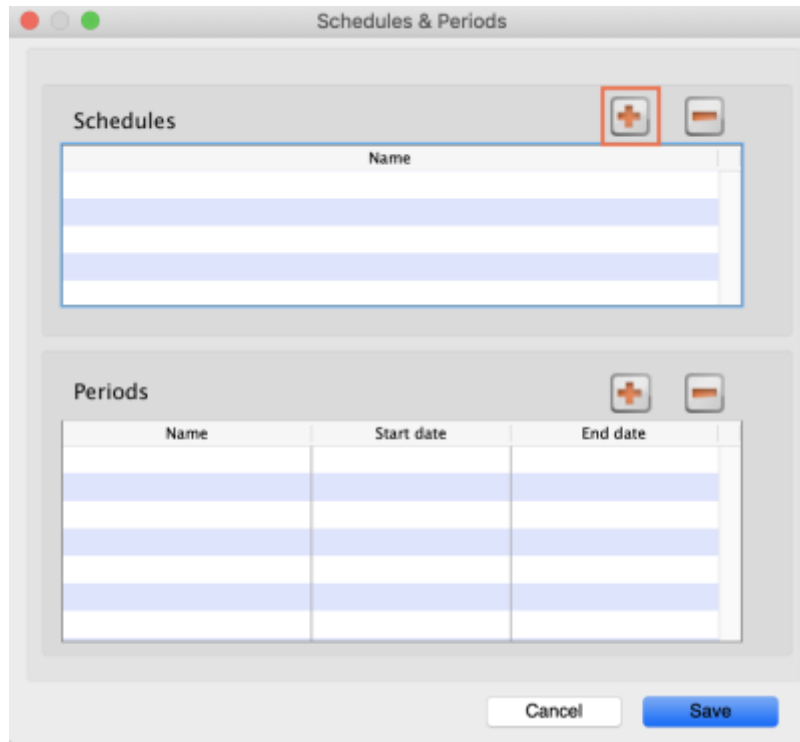

In a [sync system](#), schedules and periods must be added on the **central server** and will then sync to other sites. Permission must be switched on for a user to add/edit schedules and periods.

1. Go to **Admin > Edit Users** > double click the user to be edited > **Permissions**.
2. In the Admin section, check the **Edit periods and period schedules** box.
3. Click **OK**.

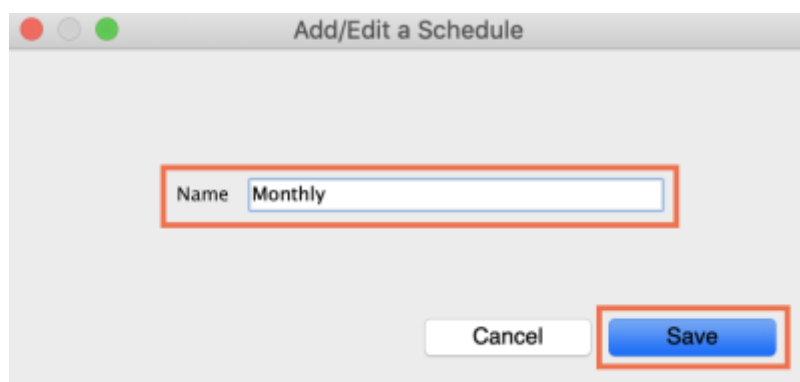

The screenshot shows the 'Edit user' interface for the 'Admin' user. The 'Permissions' tab is selected, displaying a list of permissions organized into sections: Ordering, Items, Supplier invoices with issued stock, Admin, Goods receiving, Special, and Tenders... The 'Edit periods and period schedules' option under the 'Admin' section is highlighted with a red box. Other options include 'View purchase orders', 'Create purchase orders', 'Add / edit users', 'View goods received', 'Add / edit currencies', and 'Create & edit tenders'.

## Adding schedules and periods

1. In the menu bar, click **Special** then **Periods...**
2. To create a new schedule, click the plus icon next to **Schedules**.

3. Name the schedule and click **Save**.

4. To add periods within a schedule, highlight the schedule and click the plus icon next to **Periods**.
