20.04. Procedures

Internally, a procedure in HIS is treated like a service item in mSupply, so many of the same concepts apply - see Items

The **Special > Show procedures** menu item allows you to track surgical and other procedures performed on patients. It brings up the following window:

🏚 Find procedure			
Item name 🗸 🗸 🗸	starts with 💌		
and 💌	category is	Don't Care	~
and 💌	department is	Don't care	~
Complex Find	Cance		Find

After setting the parameters, and clicking on OK, it will either show the list of procedures:

🌲 Procedu	re list									
1/11	New item	Report	Set flags	Find	Order by	Print	Modify	Duplicate	Customise	
			-		Order by	Princ			Customise	
Item Co	de	ltem name	· · · · · ·	User 1			FI,	ags		
abodef	New Proced	dure								

in which case, you can double-click on a procedure to view/edit it or select *New item* to create a new one. Or, if there are no existing procedures, it will go straight to the *Add procedure* window:

🏖 Add procedure				
Туре	service			
Item code				
Item name				
Item price	0			
Price list				

The type of a procedure is fixed as "service". As for items, once a procedure has been added, there are extra fields and tabs available. However, only a subset of the normal item fields are available.

🏖 Procedure de	tails	
General Usage Ledger Notes Misc Misc 2	General General Category None Item flag Item flag Catalogue code Hide in this store	Store: Hospital Info System Pricing Default margin Default price 2,000.00 Full description
	Custom fields user_field_1 user_field_2 user_field_3	user_field_5 user_field_4 user_field_6 user_field_7
