## Procedures

\*

<note>Internally, a procedure in HIS is treated like a service item in mSupply, so many of the same concepts apply - see Items</note>

The **Special > Show procedures** menu item allows you to track surgical and other procedures performed on patients. It brings up the following window:

🕼 Find procedure					
Item name 🛛 🗸 🗸	starts with 💌				
and 💌	category is	Don't Care	~		
and 💌	department is	Don't care	~		
Complex Find Cancel Find					

After setting the parameters, and clicking on OK, it will either show the list of procedures:

🏖 Procedure I	ist									
1/11	New item	Report	Set flags	Find	Order by	Print	Modify	Duplicate	Customise	
Item Code		Item name	Soc hags	User 1		Frinc		ags	Cascomise	
abcdef	New Proced	ure								

in which case, you can double-click on a procedure to view/edit it or select *New item* to create a new one. Or, if there are no existing procedures, it will go straight to the *Add procedure* window:

Туре	service
Item code	
Item name	
Item price	0
Price list	

The type of a procedure is fixed as "service". As for items, once a procedure has been added, there are extra fields and tabs available. However, only a subset of the normal item fields are available.

🏖 Procedure d	letails	
General Usage Ledger Notes Misc Misc 2	General General General Item code abcdef Category Vone Item flag Catalogue code Hide in this store	Store: Hospital Info System  Default margin Default margin Default price 2,000.00
		er_field_5 user_field_4 er_field_6 user_field_7

Previous: ICD10 disease codes Next: Other lists
