14.01. Notifications (Alerts)

Available in version 5.05 onwards

To help with the proper management of your stock, mSupply can inform you of things that need attention - transactions that need completing, stock that you are running out of etc.

This page will tell you how to set up and use the notifications (alerts) that mSupply can give you.

If you want to receive alerts via SMS, email or social media then you can use the mSupply dashboard for that. See the mSupply dashboard pages for details.

You can also get notifications/alerts for cold chain monitoring events. See the 20.03. Cold Chain App Notifications page for details.

Setup

Set the store parameters

Some of the notifications, like understocked or overstocked items, require some parameters to be set for each store. To set them choose *Special* > *Show stores* from the menus, double-click on the store to change the settings for and go to the *Preferences* tab. The settings you need to make are in the *Notifications* section.

All the details about these settings can be seen on the notification_preferences page.

Select which notifications a user will see

Notifications in use
