# 26.20. Document registry

The document registry is for storing...something very mysterious for Open mSupply. We will divulge the secret soon...

### View the current stored documents

To see a list of the currently stored documents, choose *Special>Show document registry...* from the menus. This window will open:

This shows a list of all the documents currently stored. If the list is long and you want to find a particular document then type something in the *Type here to search* field and the list will show only those documents with what you typed in their *Document type*.

The number in the bottom left of the window is in the format x/y where x is the number of documents displayed in the table and y is how many documents are stored altogether (i.e. displayed when nothing is entered in the *Type here to search* field.

## **Deleting a document**

Select a document in the list by clicking on it and click on the **Delete** button. After confirmation the document will be deleted and will no longer be available for use.

## Adding a document

## **Editing a document**
