

11.04. Cash register

The **Cash Register** allows you to see and create in and out payments for the customers and patients in your store. It also shows you the current balance of the cash register and you can use it to manage cash reconciliation in a store if you are using a physical cash repository of some sort.

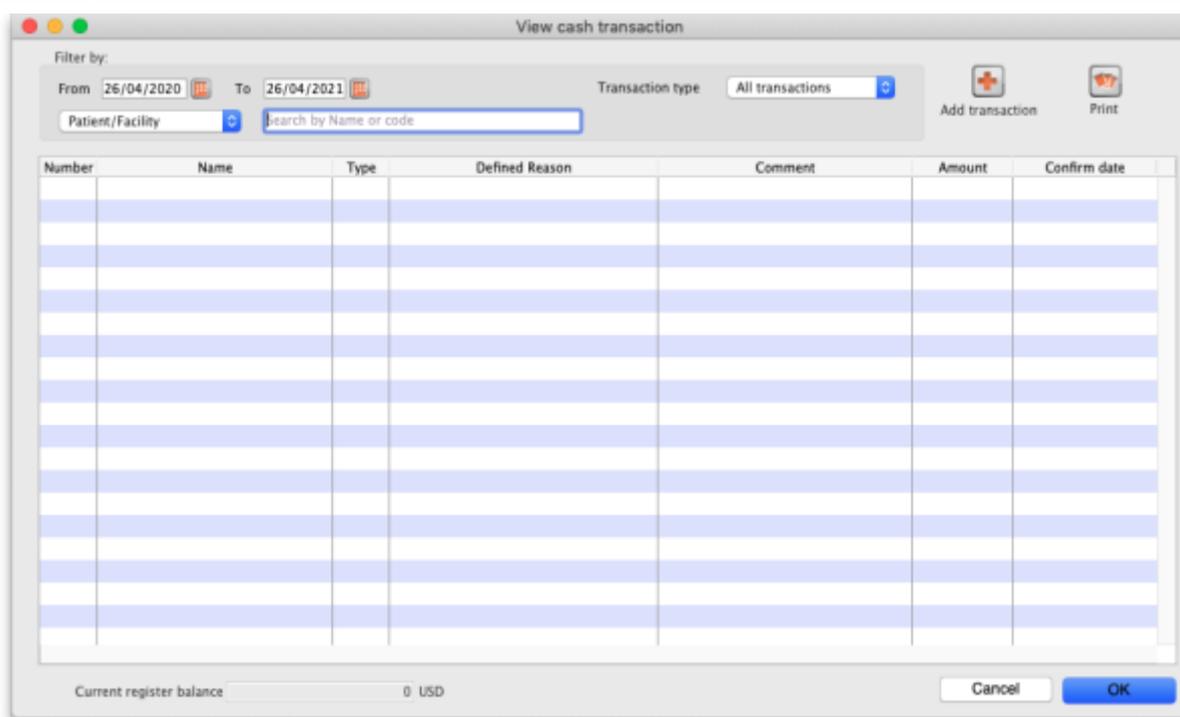

Any payments made in the [customer receipts module](#) or made on a prescription will also be show here. Those payments differ to those made in this module in that they are attached to a transaction (customer invoice or prescription). Any payments made in this module are not attached to any other transactions.

Viewing the cash register

1. Click the **Special** tab in the navigator.
2. Click the **Cash Register** button:

3. The **Cash Register** will open:

By default the window will show all of today's transactions when it opens but you can use the filters at the top in the *Filter by* section to see just the payments you want in the table.

The *Current register balance* shows you the current balance of all the in and out payments in the datafile - this is the amount of cash you should have in your physical cash repository if you're using one.

For each transaction in the table you can see:

- Who the cash was received from or paid to
- Payment type:
 - **rc** is a cash receipt (cash paid to you by a customer or patient)
 - **ps** is a cash payment (cash paid by you to a "supplier")
- Amount received or paid, where a **positive** number is **cash in** and a **negative** number is **cash out**
- Date of the transaction
- Other details such as reasons and comments

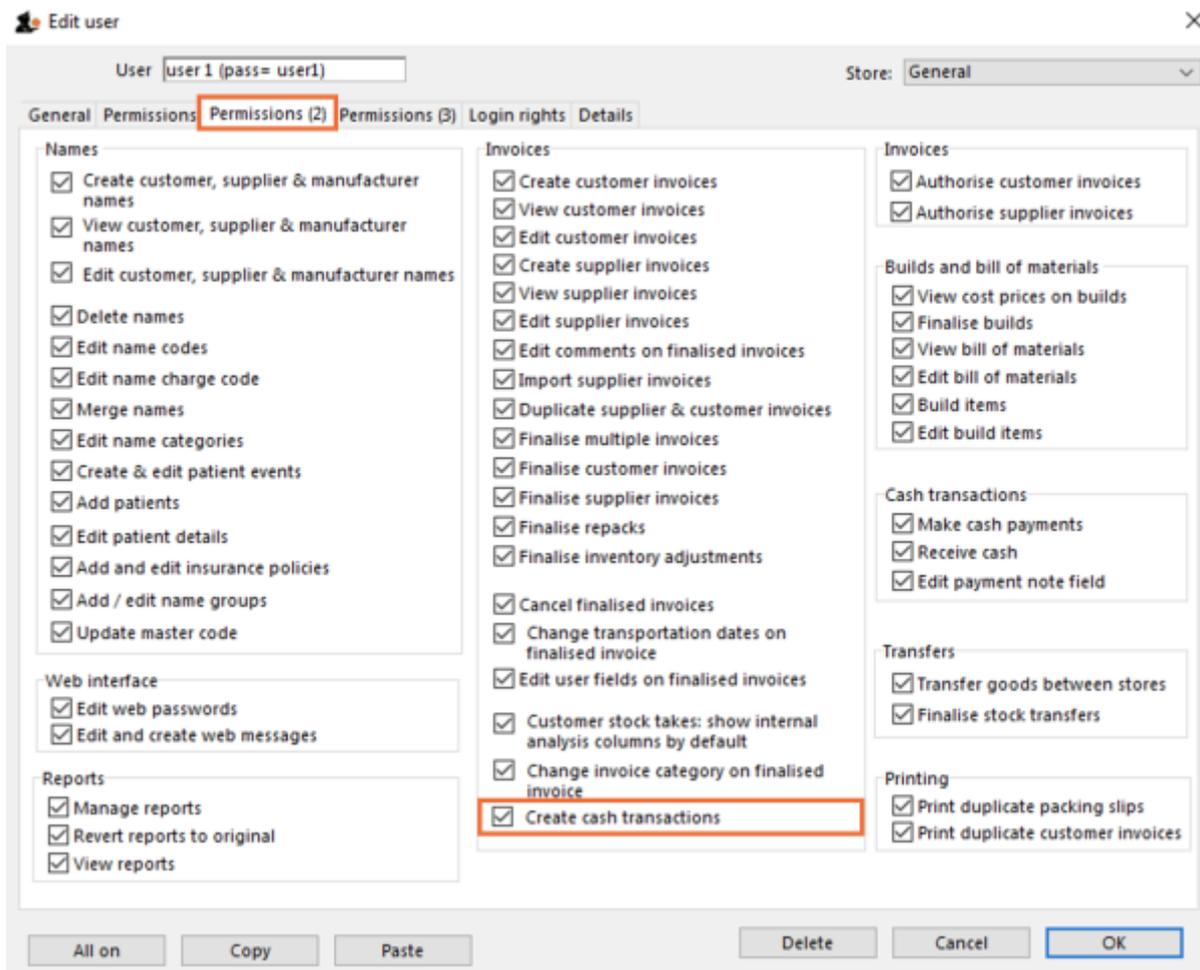

Adding or removing cash

All transactions involving cash movement will be *automatically* added to the cash register. For example, receiving payments for prescriptions or making payments of supplier invoices.

You can set permissions to allow users to manually add **cash in** or take **cash out** from the cash register. For example, this may be necessary for depositing cash in the bank.

Permissions for manual cash in/out transactions

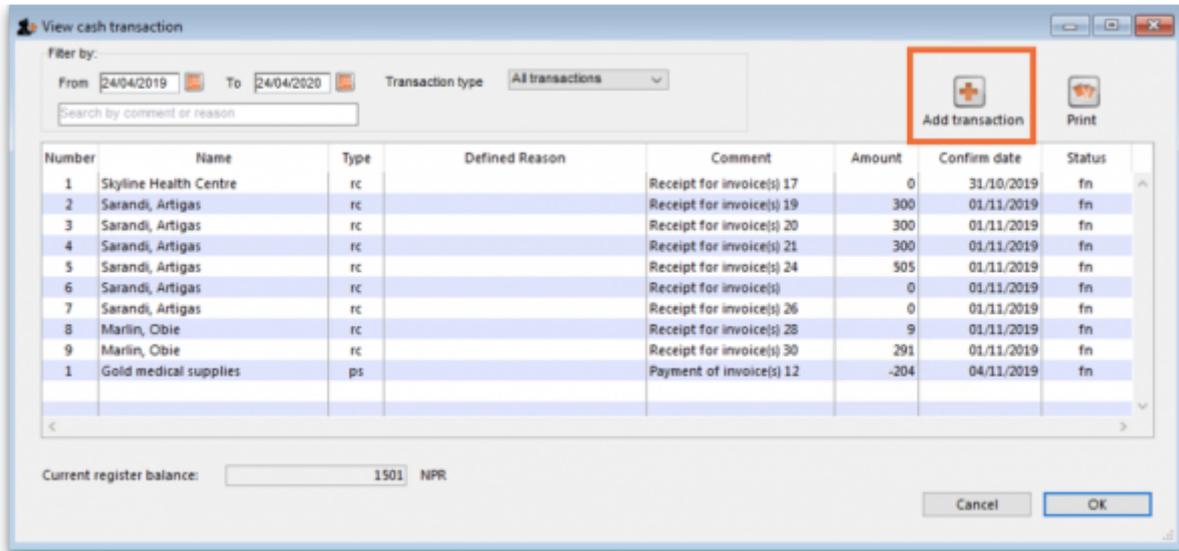

1. Go to **Admin > Edit Users >** double click user name.
2. In the **Permissions (2)** tab, check the **Create cash transactions** box to allow the user to perform manual cash in/out transactions.
3. Click **OK** until you return to the navigator screen.

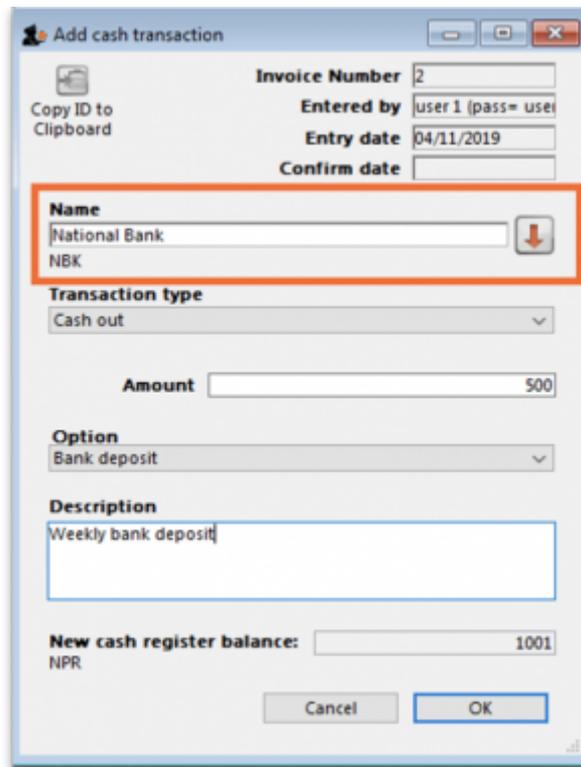

Manual cash in/out transactions

Once permissions are set:

1. Click the **Special** tab in the navigator.
2. Click the **Cash Register** button.
3. Click the **Add transaction** button. Note: If the user does not have permission to make cash register transactions, an error message will appear and they will not be able to proceed.

4. Add the **Name** of the person/organisation to which the transaction relates.

5. Select the **Transaction Type** from the dropdown list: **Cash out** (remove) or **Cash in** (add).

6. Enter the **Amount** of cash being removed or added.

The screenshot shows a dialog box titled "Add cash transaction". It contains several fields: "Invoice Number" (2), "Entered by" (user 1 (pass= user)), "Entry date" (04/11/2019), and "Confirm date" (empty). Below these is a "Name" field with "National Bank" and "NBK" below it. A red box highlights the "Transaction type" dropdown menu, which is set to "Cash out", and the "Amount" field, which is set to "500". Below the highlighted area is an "Option" dropdown menu set to "Bank deposit" and a "Description" text box containing "Weekly bank deposit". At the bottom, there is a "New cash register balance:" field set to "1001" with "NPR" below it, and "Cancel" and "OK" buttons.

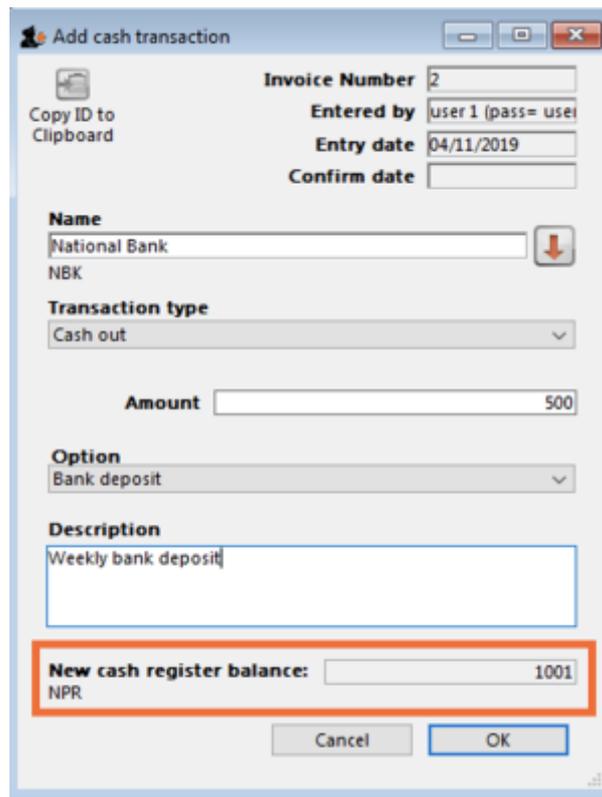

7. If you are making a cash out transaction and the **Option** dropdown list is activated, you must select a reason for removing cash. You may also add a **Description** to give further details of the transaction.

You can set a list of standard **Options** for the user to select from when removing cash from the register.

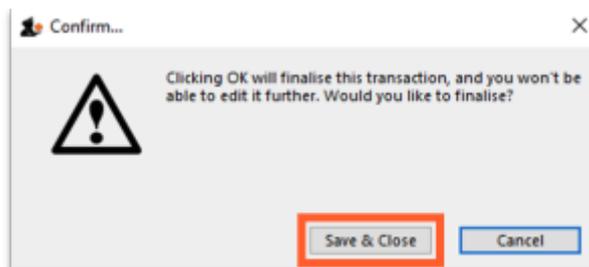

This screenshot is identical to the one above, but with a red box highlighting the "Option" dropdown menu (set to "Bank deposit") and the "Description" text box (containing "Weekly bank deposit").

8. Review the **New Cash Register Balance**, which will be automatically calculated.

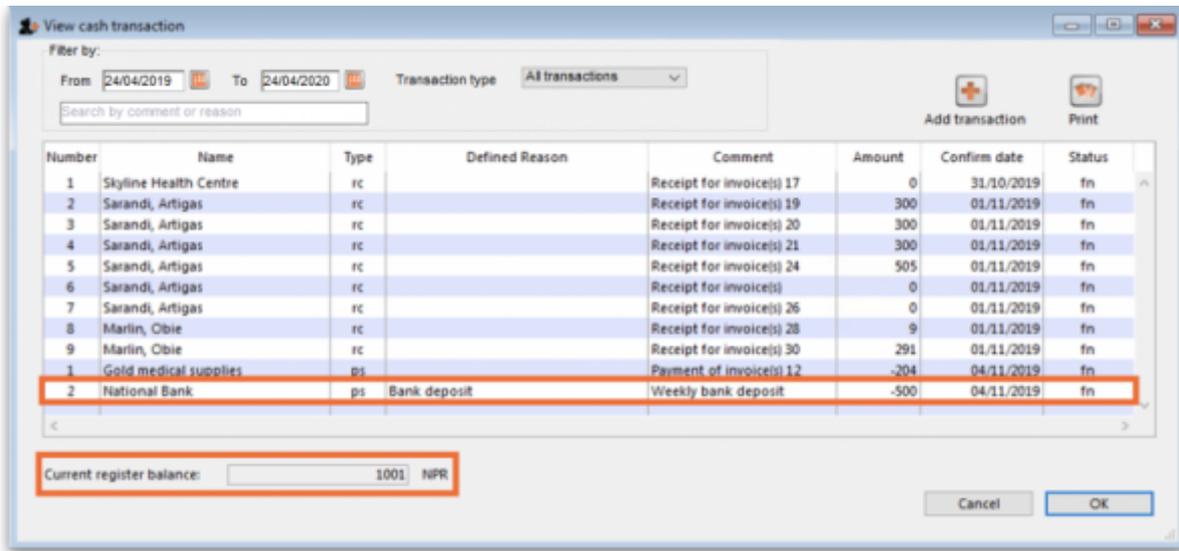

The screenshot shows a dialog box titled "Add cash transaction". It contains several fields: "Invoice Number" (2), "Entered by" (user 1 (pass= use)), "Entry date" (04/11/2019), and "Confirm date". Below these are "Name" (National Bank, NBK), "Transaction type" (Cash out), "Amount" (500), and "Option" (Bank deposit). The "Description" field contains "Weekly bank deposit". At the bottom, a field labeled "New cash register balance:" is highlighted with a red box and shows the value "1001 NPR". There are "Cancel" and "OK" buttons at the bottom right.

9. Click **OK**, then click **Save & Close** to finalise the transaction. Once finalised, the transaction can no longer be edited.

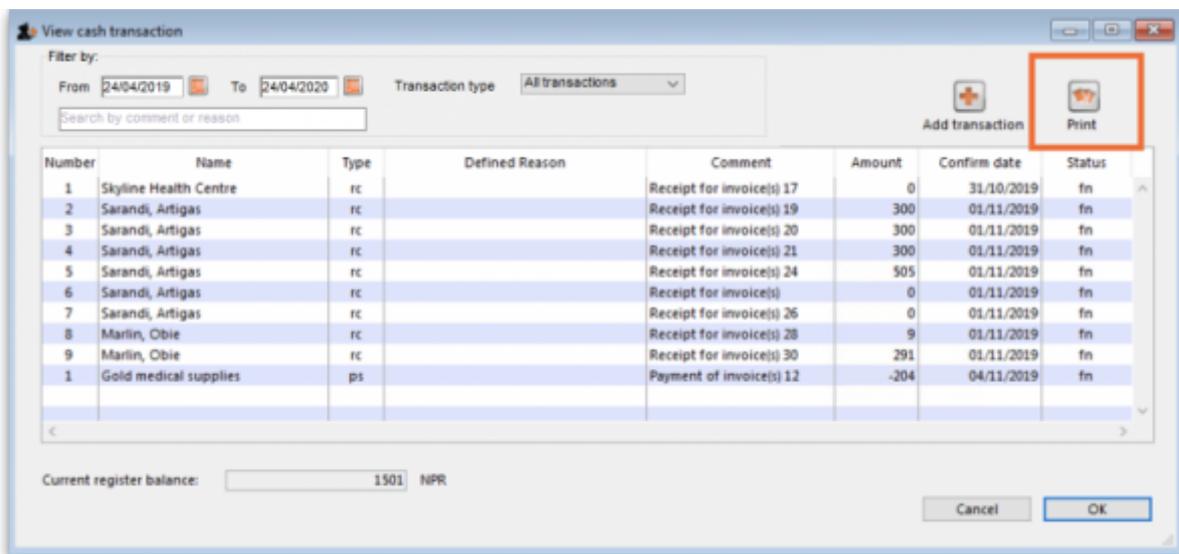

The screenshot shows a dialog box titled "Confirm...". It contains a warning icon (a triangle with an exclamation mark) and the text: "Clicking OK will finalise this transaction, and you won't be able to edit it further. Would you like to finalise?". At the bottom, there are two buttons: "Save & Close" (highlighted with a red box) and "Cancel".

10. The new transaction will now appear in your cash register and the **Current register balance** will be updated.

Printing a cash transaction report

1. Click the **Special** tab in the navigator.
2. Click the **Cash Register** button.
3. Click the **Print** button.

4. An Excel spreadsheet will open containing the same information as the cash register window. You can now save and/or print the spreadsheet from Excel.
