

15.05. Tender reference documents

While managing a tender, several documents may be consulted - for example, the quotations received from bidding suppliers, quality assurance documents, or pre-qualification documents. These documents, provided they are in electronic form (or have been scanned into electronic form if they were supplied as paper copies), may be uploaded and conveniently stored so that they may be readily consulted.

To access this functionality, open a tender by choosing **Supplier > Show Tenders...** from the menus and double-click on the tender you want (or create a new one) to add reference documents to. Finally, click on the **Reference documents** tab:

The screenshot shows the 'New Tender' window with the 'Reference documents' tab selected. The window contains several input fields and a table. The 'Reference documents' tab is highlighted, and below it are three buttons: 'Upload document', 'Delete document', and 'Download document'. Below these buttons is a table with the following columns: 'File Name', 'Created by', 'Created on', 'Saved on', and 'Version no'. The table is currently empty.

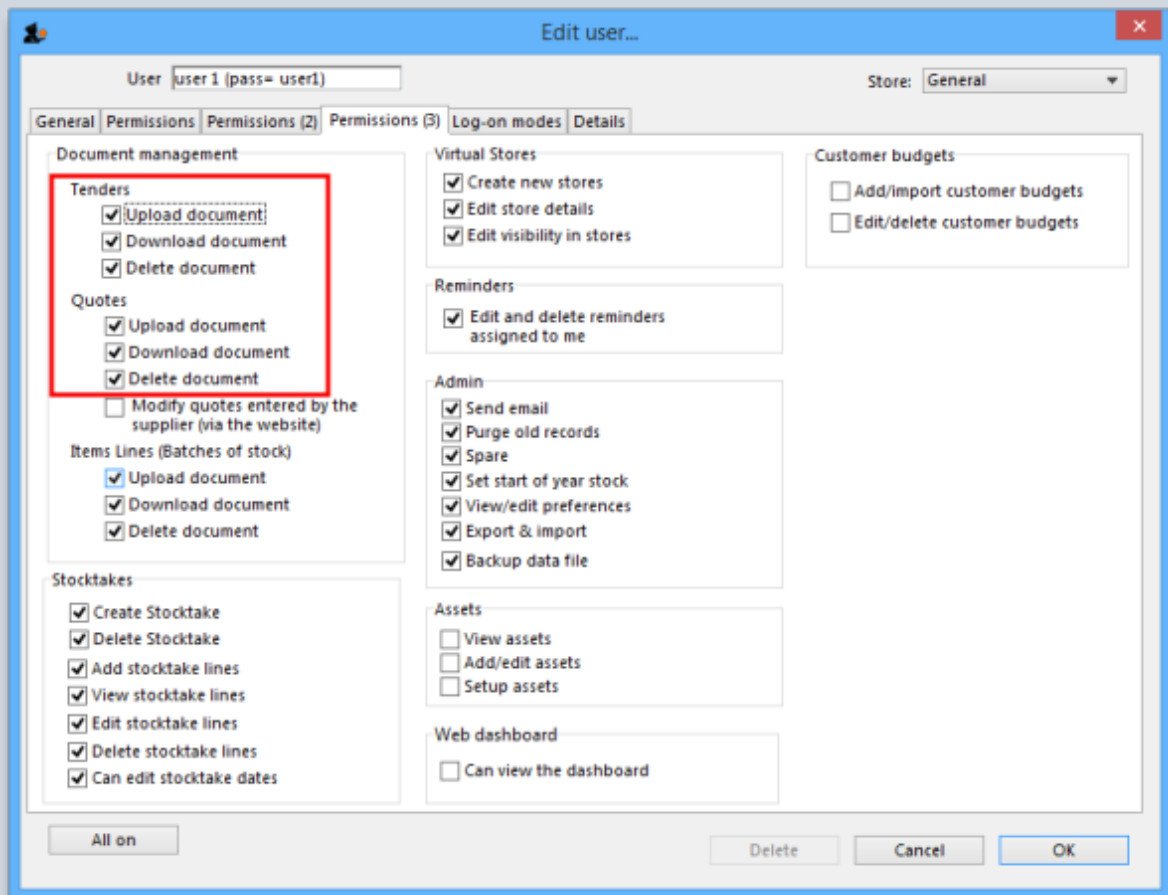

Upload document button: Click on this to store a document in the tender. You will be shown a window allowing you to browse to the required document. Double-click on the document or click on it and click the **Open** button to add it to the tender (called "uploading" it). Once it has been successfully uploaded it will appear in the list of documents below the buttons.

Delete document button: Click on a document in the list to select it and click on this button to delete the file and remove it from the tender. You will be asked to confirm the deletion.

Download document button: This will allow you to save one of the files in the list to your computer (called "downloading" it) so that you can view or edit it. Click on the file you want to view or edit to select it in the list then click on the **Download document** button. You will be shown two options: click on *Download* to just save the file on your computer or *Download and open* to save the file on your computer and open it for viewing or editing. A window will open for you to select the location to save the file on your computer. Browse to the folder you want to save it in then either double-click on the folder or click on it to select it then click on the **Open** button. The file will be saved in the location you chose. If you selected the *Download and open* option the file will also be opened for you to view or edit.

If you want any edits you make to the document to be saved to the tender, when you have finished editing, you must upload the edited version to the tender using the **Upload document** button. Don't forget or your edits will only exist on your computer, not on the tender! It is not necessary to change the document's name so that you don't overwrite the original, as mSupply will recognise that changes have been made, and will save it as a new version (and keep the old version too). The file's version number will appear in the *Version no* column. The **Show** drop down list above that column allows all versions to be displayed, or only the latest one.

The ability of users to upload and download documents to and from tenders is covered by permissions. To set these permissions choose the **File > Edit users...** menu item, double-click on the desired user, and set their permissions on the *Permissions(3)* tab:

The screenshot shows the 'Edit user...' dialog box with the 'Permissions(3)' tab selected. The 'Tenders' section is highlighted with a red box, indicating the permissions for document management. The 'Permissions(3)' tab is the third of four tabs, with 'General', 'Permissions(2)', and 'Log-on modes' also visible. The 'Store' dropdown is set to 'General'. The 'All on' button is at the bottom left, and 'Delete', 'Cancel', and 'OK' buttons are at the bottom right.

Section	Permission	Status	
Tenders	Upload document	Checked	
	Download document	Checked	
	Delete document	Checked	
Quotes	Upload document	Checked	
	Download document	Checked	
	Delete document	Checked	
Items Lines (Batches of stock)	Upload document	Checked	
	Delete document	Checked	
Stocktakes	Create Stocktake	Checked	
	Delete Stocktake	Checked	
	Add stocktake lines	Checked	
	View stocktake lines	Checked	
	Edit stocktake lines	Checked	
	Delete stocktake lines	Checked	
Virtual Stores	Create new stores	Checked	
	Edit store details	Checked	
	Edit visibility in stores	Checked	
	Reminders	Edit and delete reminders assigned to me	Checked
	Admin	Send email	Checked
		Purge old records	Checked
Spare		Checked	
Set start of year stock		Checked	
View/edit preferences		Checked	
Export & import		Checked	
Assets	View assets	Unchecked	
	Add/edit assets	Unchecked	
	Setup assets	Unchecked	
Customer budgets	Add/import customer budgets	Unchecked	
	Edit/delete customer budgets	Unchecked	
Web dashboard	Can view the dashboard	Unchecked	

See [Managing users](#) if you need more detail.
