

# 21.05. Schedules and periods

## Schedules and periods

**Schedules** are regular timeframes (e.g. monthly, fortnightly) that may be used for cyclical operations, such as program orders. There is no limit to the number of schedules.

**Periods** are specific timeframes which exist *within* schedules. Periods have a distinct start and end date. They must be sequential and must not have any overlapping dates or gaps between periods.

## Permission to add/edit schedules and periods

Schedules and periods can only be added and edited on the **central server**. Permission must be switched on for a user to perform this function.

1. Go to **Admin > Edit Users >** double click the user to be edited > **Permissions**.
2. In the Admin section, check the **Edit periods and period schedules** box.
3. Click **OK**.
