## 15.03. Barcode scanning and receiving goods

## Added: Version 4.01

When you receive goods into mSupply, that is when you tell mSupply about the barcode that belongs to each line of stock. At the moment it is not possible to receive stock using a barcode scanner (the functionality is coming soon though - watch this space) but this is still the point in your process where you tell mSupply about the barcode that belongs to each line of stock.

This is a vitally important step: once the barcode associated with the stock you receive is recorded, mSupply can recognise it anywhere when you scan it later.

The linking of barcodes with received stock is carried out on a supplier invoice.

Create a supplier invoice in the normal way (either manually (see Receiving goods - a supplier invoice or by finalising a goods received note (see Goods receipt notes)). If the *We use barcode scanners* preference is turned on (see Barcode scanning preferences), this is what a blank supplier invoice invoice window looks like:

Supplier invoice		2	Confi	m date : 00/0	0/00			Black
Their ref	testsup(	01	Category 1		~		Invoice number : 0 Entry date : 28/01/20 Status : nw	
New line Delete line Print barcode labels	ce Log						ods received D : 0 chase Order D : 0 Entered by : user 1 ( Store: General	
L Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	^
<								>
Other charges           Item(s):							Subtotal: 0 % tax:	0.00
Amount	0.00						Total:	0.00
Hold Export batch: 0 Finalise Margin: 0.00					OK & Next	Dele	e OK	

It is exactly the same as a standard supplier invoice, except for an additional *Print barcode labels* button (see <u>Barcode label printing</u> for details)

Clicking on the *Add line* button shows an extra *Barcode* field on the invoice line window:

1 Add/edit suppli	er invoice line				×
Item				T	New item
Quantity Pack size				Pack to one	
Total quantity: Batch		Barcode	~	Location	5
	00/00/00		Volum	ne per pack	m3 🕥
Invoice line unit cost (USD) Price extension (USD)		Adjusted local cost 0.00	% Margin 0.00	Sell price 0.00	
		C	ancel	ОК	OK & Next

When the item has been selected in the usual way, the *Barcode* drop down list is filled with a list of all the barcodes assigned to the item, showing the pack size and manufacturer for each:

1 Add/edit supplie	er invoice line		×
item Quantity Pack size		test01	New item
Total quantity: Batch Expiry		Barcode Please select Location None Please select Add one Pack 1, Manuf. Test manufacturer 01 Adjuste Pack 10 Sell price	0 m3
Invoice line unit cost (USD) Price extension (USD)		0.00 0.00 0.00	K & Next

If one of the barcodes matches the stock that is being received, select it: this will set the *Pack size* field to match the pack size that belongs to the barcode. You can still manually edit the *Pack size* field but if it doesn't match the barcode you have selected when you click on the *OK* or *OK* & *Next* buttons, you will be warned and told to correct it (either select another barcode with a matching pack size or alter the pack size).

If none of the barcodes in the drop down list match the one on the stock, you can click on the *Add one...* option. This will immediately open the Add barcode window so you can add the new barcode. See Adding barcodes to items for details.

Note that once you have selected a barcode, the *Please select...* option in the **Barcode** drop down list becomes *Remove barcode* to show that selecting this option will remove the barcode from this line.

When you are using barcode scanning, you must select a barcode from the Barcode drop down list,

you will not be allowed to add the line without it.

## Manually assigning barcodes to stock lines

Sometimes it might be necessary to manually add or edit the barcode that belongs to a stock line. For example, any stock you have in mSupply before you turn on the barcode functionality will not have barcodes entered against it they will need to be added manually. Or an incorrect scan may have been made at goods receipt and the barcode might need to be changed.

To do this, first choose Items > Show items from the menus, search for the item whose stock you wish to edit and open its details window by double-clicking on it. Then click on the *Stock* tab:

							ltem de	ldii 5						
eneral	<b>D</b>	Item	name Te	est item (	)1						Stor	e: General		0
torage	ŵ	Item	code Ts	titem01

Now double-click on the stock line whose barcode you wish to change. This will open the stock line details window:

The **Barcode** drop down list displays the current barcode assigned to the stock line (it will say *Please select...* if it has no barcode assigned). The current barcode will also be shown to the right of the drop down list, as in the screenshot, if one is currently assigned.

Click on the drop down list and you will be shown a list of all the barcodes of the same packsize as this stock line for this item. You can select any one of these or the *Add one...* option to open a new window to add a new barcode (see the 14.02. Adding barcodes to items page for details on that window).

If a barcode is already assigned to the stock line, the first option in the **Barcode** drop down list will be *Remove barcode* - select this if you want to remove the barcode current assigned ot this stock line.
