

10.07. Diagnoses

The **Diagnoses** functionality allows you to quickly save a diagnosis on a patient's prescription.

Viewing and Adding Diagnoses

Select the **Diagnoses** icon from the **Special** tab on the mSupply navigator window.

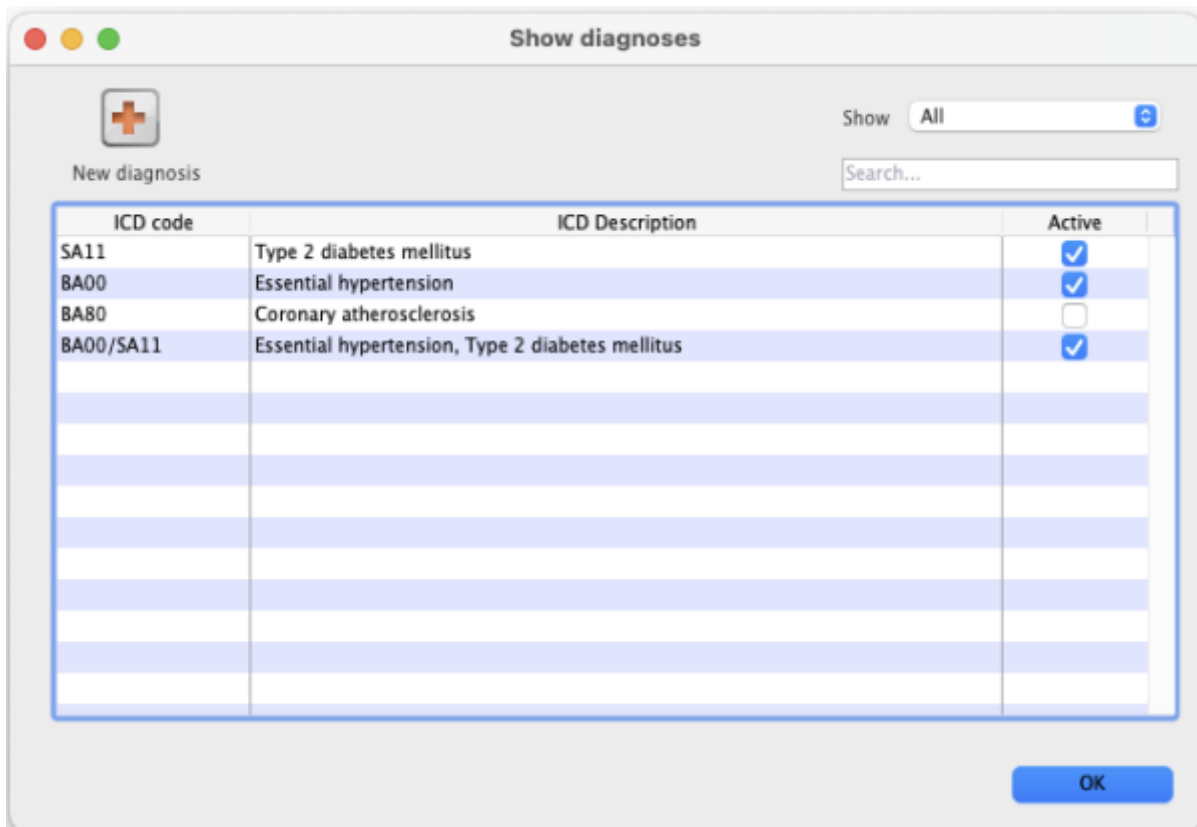

This will open the **Show diagnoses** window with a list of all diagnoses.

- The list will initially be ordered by date created. However, the list can be sorted by the ICD code or ICD description by clicking on the respective column header.
- You can use the search box to search for a diagnoses using either an ICD code or the ICD description.

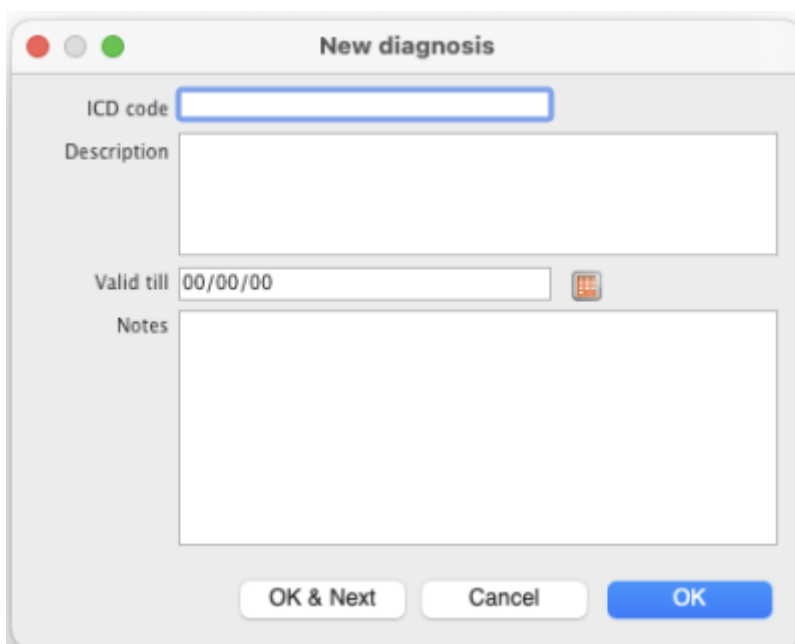

Standard mSupply search functionality applies when searching for diagnoses.

The list can be filtered using the **Show** drop-down box on the top right of the window:

- **All**: active and inactive diagnoses.
- **Active**: diagnoses that have not yet reached their specified valid till date.
- **Inactive**: diagnoses that have passed their specified valid till date. Inactive diagnoses will not appear in other windows, and cannot be saved to a patient prescription.

Click on the **New diagnosis** button on the top-left of the window to add a new diagnosis. This window will open:

Enter the **ICD Code** and **Description**. Please note:

- Both code and description boxes are mandatory.
- mSupply does not check the data entry in these boxes. Please double-check that you have entered the information correctly.

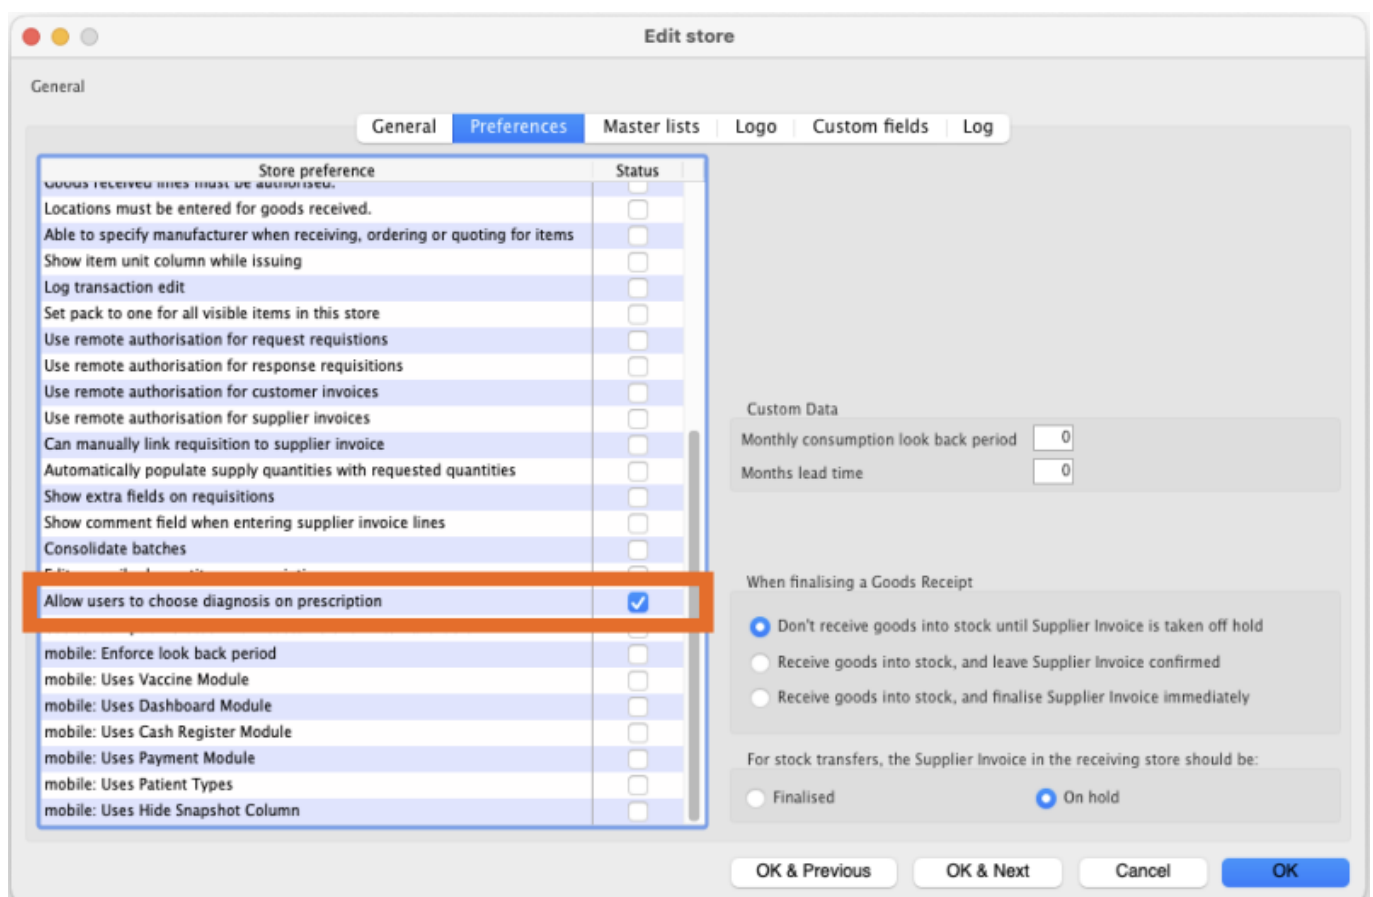

Enter the **Valid till** date. You can use the date selection tool by clicking on the calendar to the right of the box.

- The date entered determines how long the diagnosis will remain active. After this date the diagnosis will be automatically made inactive.
- The valid till field is non-mandatory. Leaving this field blank results in the code remaining permanently active.

Diagnoses on Prescriptions

You must first enable store preferences to allow diagnosis selection on prescriptions.

From the **Special** tab or menu item, select **Stores**, and then select the store that you wish to allow diagnosis selection. Select the **Preferences** tab on the Edit Store window.

Select **Allow users to choose diagnoses on prescription**.

Save by selecting **OK**.

As a result, when you create a new prescription, you will be able to select a diagnoses using a drop-down box. The drop-down box will display and allow selection of any active diagnoses.

Prescription Entry

Patient details

Name: [] Date of birth: 00/00/00 Female Store: Hawthorn East Clinic
Code: [] Address: [] Entered 27/11/20
Prescriber: Search Prescriber [] Confirm date: 00/00/00 Invoice: 0
Code: [] Prescription date: 27/11/20 Entered by Name (password = pass)

Diagnosis: None

Reference: [] Category: None
Note: []

Line	Location	Item Name	Quan	Pa...	Batch	Exp date	Sell Price	Price exten

Item: [] Amount: 0.00

Date: [] Notes: []

Subtotal: 0.00
0% tax: 0.00
0% discount: 0.00
Total: 0.00
Amount Outstanding: 0.00

Finalise Export batch: 0 Status: nw

OK & Next Delete OK

The diagnosis selected will be saved against the prescription together with all other information provided in the Prescription Entry window.
