

24.09. Imprest work flow

Version : v3.11 or v3.12 or later

The impost module allows a pharmacy or warehouse to decide on quantities of drugs its receiver facilities (customers or [Virtual stores](#)) should receive. Periodically a stock take is carried out at the customer's site and drugs are replenished to meet the predefined (imprest) level.

The tutorial below suggest how an impost should now be carried out.

We will assume that the facility or customer has been assigned with a suitable impost list. If this is not the case then please do the following:

- Select Item > Show Item master list... from the menus to create a master list (see [here](#) for details).
- Assign the master list to the customer. See [Item Lists > Assigning a list to a customer](#) for instructions.

Create an impost

Click on 'Requisitions' in the 'Customer' (or Patients) tab.. Click on the *New customer impost* icon in the window which appears.

ID	Name	Date entered	Requisition date	Status

Type the first few characters of the customer name in the Name field and press tab. A List of matching customers is displayed (unless only one customer name matches what you entered). Choose the intended customer and click the *Use* button.

At this point the master list of items associated with the customer is displayed in its default sort order.

Print the imprest

The image below shows an example of what you now see: a list of items with their required imprest quantities. The next task is to print the list and carry out a physical stock take at the customer site.

First of all, make sure the list is in the correct order. If it is, fine. If not, re-order it as appropriate (by clicking on the column headers or dragging items up or down the list) and click on the *Save Sort Order* button.

Now print the list by clicking on the *Print* button and selecting the “Customer stock takes” option.

The print dialogue opens. Here you can add header and footer information for your printouts. Press OK when ready and print the list.

Header

Destination

☒ Printer ☐ Preview on screen before printing

☐ Open in Excel

☐ Save as HTML file

☐ Save as Text file

Choose report type

Report name : customer_stock_takes

Cancel OK

[illegible]

Please note that after printing the list you should not re-order it - it will be confusing later when you come to enter the counted quantities for each item.

Now, using the printout, carry out the actual stock take.

Updating the stock quantities

After carrying out actual stock take at the customer's site it's time to enter the actual stock quantities. In the window displayed below, edit the value in the *Customer current stock on hand* column with the stock take quantities you've written on the print out for each item.

mSupply automatically completes other two columns (*Our suggested quantity* and *Actual quantity*)

Imprest formula:

- Our suggested quantity = Maximum of
 - 0, and
 - Imprest quantity - Customer current stock on hand

Assigning stock

Once the updating of stock quantities is done and you are satisfied, you can click the *Create customer invoice* button to assign stock to the customer. Clicking the button will open the following window:

Name <input type="text" value="Amnesty Hospital"/>	Confirm date : <input type="text" value="00/00/00"/>	Colour Black
Their ref <input type="text" value="AMN"/>		Invoice : 21
Comment <input type="text" value="Invoice from requisition"/>	Category <input type="text" value="None"/>	Entry date : 20/03/18
		Goods received ID : 0
		Status : sg
		Entered by : Admin
		Store : General Warehouse

☒ Hold
☐ Finalise

Export batch: 0

OK & Next

Delete

OK

All the entries appear in red - they are **placeholder** lines which have the correct quantity but have no batch chosen (notice 'none' in the batch column for each line). You have to double-click each line in turn and select which batches you wish to assign to the customer.

As an example, you will see the window below when you double click an item line:

Item  030453

Line

Quan of 0 Total

Pack Tablet Bulk/Outer pack size 0

L...	Issue	Available	Tot in st...	Pack	H...	Batch	Expdate	Supplier	Location	Cost Price	Sell price	Status
1	5	0	0	1	<input type="checkbox"/>	none				0.00	0.00	
2	0	21....595	2397.595	1000	<input type="checkbox"/>			inval	B1	0.00	0.00	
3	0	14	20	500	<input type="checkbox"/>	17KD003	9/12/17		B1	0.01	0.01	
4	0	0	50	1000	<input type="checkbox"/>	K568672	9/12/17		B1	0.03	0.03	

Total quantity issued 5
 Total quantity available 2204595

Normally you would click on the *Re-distribute all* button to have mSupply make the appropriate selection for you (it chooses batches with shortest expiry first). Having done that, the window now appears like this:

Item  030453

Line

Quan of 2197.59 Total

Pack Tablet Bulk/Outer pack size

L...	Issue	Available	Tot in st...	Pack	H...	Batch	Expdate	Supplier	Location	Cost Price	Sell price	Status
1	0	0	0	1	<input type="checkbox"/>	none				0.00	0.00	
2	1	21...595	2397.595	1000	<input type="checkbox"/>			invad	B1	0.00	0.00	
3	0	14	20	500	<input type="checkbox"/>	17KD003	9/12/17		B1	0.01	0.01	
4	0	0	50	1000	<input type="checkbox"/>	K568672	9/12/17		B1	0.03	0.03	

Total quantity issued 1000
Total quantity available 2204595

Clicking on **OK & Next** displays the next item on the invoice. When the final item has been processed, clicking on **OK** or **OK & Next** will display the complete invoice (all red lines replaced with black lines with the chosen batch displayed). The image below shows the invoice part way through this process:

When you've selected batches for every line, make sure the *Hold* checkbox is not checked then confirm the invoice to assign the stock to the customer. Now all you have to do is print off the pick list, physically pick the stock off the shelves and send it to the customer. Congratulations - job done!
