

## 8.06. Box management

Added: Version 3.1

Boxing is telling mSupply which boxes you packed issued stock into. This is helpful for transport and providing more information to your customers. You can either manually pack items into boxes or have mSupply suggest an optimal pack for you.

### Manually packing boxes

On the transport tab of a customer invoice window, there are two methods for managing boxes.

- The simple method allows you to directly enter any Box identifiers in the **Boxes** column
  - To use this method you should **not** turn on the preference mentioned below. You simply click twice (slowly) in the box numbers column of the "Transport details" tab on a customer invoice and enter box numbers.
- If you want to assign exact quantities of each invoice line to a box or boxes, and also possibly record box weights and volumes, you need to:
  - Choose Special > Show Stores
  - Double-click on the store in question (you might only have one)
  - Click on the **preferences** tab
  - Check "Able to pack items into multiple boxes" - see details on the [24.08. Virtual stores](#) page.

The rest of this page assumes you're using mSupply with this preference checked.

### Setting up boxes

- Once you've created a customer invoice, and picked goods, the pickers should have marked the pick slip with what quantities of each item were put into what box.
- Now go to the **Transport** tab of your customer invoice.
- Click **Manage Boxes** (Note: if you haven't turned on the preference as above, these buttons are hidden)
- You'll see this window:

Description	Type	Calculated vol (m3)	Calculated weight (kg)	Volume (m3)	Weight (kg)	Length (m)	Width (m)	Height (m)

- Click **New** to add boxes
- We suggest you keep box names short. e.g. 1, 2, 3, 4 or A, B, C, D
- Type a box name, click **OK & Next** (shortcut: the Enter key) to add another box.
- On the last box click **OK** to save and close the window.
- If you're Gary, you might have clicked **OK & Next** one too many times. In that case you can use the **Cancel** button to close the window. 😊
- Note that you can't have a blank box name, and you can't have two boxes *on the same invoice* with the same name (You *can* just use the same series of box names over and over on different invoices).
- If you make a mistake with a box name you can double-click a row to edit it.
- Click **OK** to close the Box Management window when you're done.

## Using the Box Selected Button

- In most cases you will be able to put the total contents of an invoice line in the one box.
- In that case, click on a row, or hold down <control> (Windows) or <command> (Mac) and click on multiple rows.
- In the example below we have highlighted rows 2, 3 and 4.

Box Description	Quantity	Weight(kg)	Volume(m3)
C	100	0	0

- Notice that at the top of the window “1900” is in red. That's the quantity still to distribute.
- Click the **Add to box** button.
- You'll see this window:

Box: A

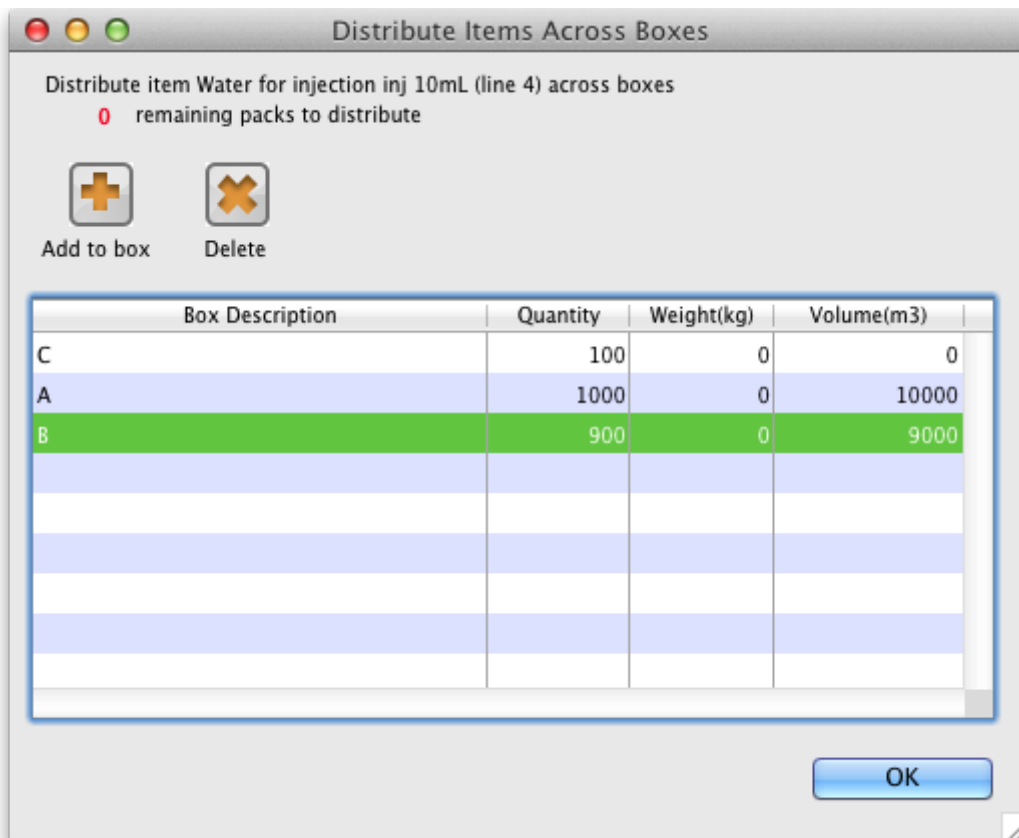

Quantity: 1900 Available : 1900

Weight (kg): 0

Volume (m3): 19000

Cancel OK OK & Next

- Let's say we're going to put 1000 in box A and the remaining 900 in box B
  - Enter 1000 in the quantity field
  - Choose **A** from the drop-down list
  - Click **OK & Next**
  - Fill out the window to enter 900 in box **B** and click **OK** to close the window.
  - Now your window should look like this:

- You can double-click a row to edit it.
- To delete a row, click on it to highlight it, then click **Delete**
- Note that the weight and volume for the item will be calculated automatically if you have set them in the item details window, but you can also override the calculated weight/volume when you are assigning an item to a box.

## Removing an invoice line from all boxes

- You can use the **Unbox** button to remove an invoice line from all boxes at once.
- Highlight one or more invoice lines.
- Click **Unbox**
- You're done.

## Seeing what is in a box

- If you click **Manage Boxes** and then double-click a box you will be shown a list of items in that box.
- You can also set the measured weight and volume in this window, which will usually be somewhat higher than the calculated weight/volume:

**Manage Boxes**

Box name

Type

Packed length (m)

Packed width (m)

Packed height (m)

Packed weight (kg)

Packed volume (m3)

  
Set wt & vol to  
calculated

Current box contents

Description	Quantity	Weight (kg)	Volume (m3)
(COVID-19) Nas...ink Tubing, Ad	2	0	0

Total in box:      0 kg      0 m3

## Printing packing list for each box

- We have custom printing forms available that will print packing lists for each box. Ask us for more details.

## Using mSupply to suggest an optimal pack

Rather than you manually entering which boxes the stock has gone into, mSupply can suggest an optimal pack for you. You can choose to accept or reject the pack it suggests. If you accept it, the stock is automatically packed into the boxes suggested and you can print out a guide for the packers to then follow this pack. Should you need to, you can still edit an optimal pack using the functionality described in the section above.

mSupply uses the volume of the stock and the volume of the boxes to determine what can be packed into which box so it needs both of these pieces of information. mSupply will also use the carton pack size to recognise manufacturer cartons and leave those out of the pack if you enter the carton pack size information when you receive stock.

Enter the details in the various fields as follows:

- **Description:** The name of this box type (this is **not** the name that boxes of this type will be given when they are created. It is the name of the type of box only)
- **Length:** The length of boxes of this type in metres
- **Width:** The width of boxes of this type in metres
- **Height:** The height of boxes of this type in metres
- **Volume:** This is read only and will be calculated for you as the Length, Width and Height values are entered or edited. The value is shown in m<sup>3</sup> and is the volume available for filling with stock.
- **Is active checkbox:** Checked by default for new box types. If checked then this box type is used in suggested packs. If it is unchecked then this box type is not used in suggested packs.
- **Number available:** The number of boxes of this type that are available for packing goods into. The number is automatically decremented as boxes are used in packs. If it reaches 0 then boxes of this type are no longer used in suggested packs.

When you have finished entering or editing the information, click on the **OK** button to save the changes or the **Cancel** button to discard them. To save your changes and immediately add another box type or edit the next one in the list, click on the **OK & Next** button instead of the **OK** button.

## Set the box packing preferences for the store

There are some store dependant preferences which you can set, as described on the [26.07. Virtual stores](#) page.

## Turn on the preference to use carton pack sizes

This is an optional step. If you don't want mSupply to recognise and exclude manufacturer supplied cartons from the pack (and therefore pack all lines on the customer invoice into boxes) then you can ignore this step.

To turn the preference on, choose *File > Preferences* from the menus and go to the *Invoices 1* tab and check the **Show inner and outer pack fields** checkbox. The preference and what it does is described on the [16.03. Invoice preferences](#) page.

When the preference is turned on, don't forget to tell the users to enter the carton pack size in the **Quan per inner** field on a supplier invoice when stock is received. Unlike volume per pack, there is no way to add the inner pack size to stock lines that have already been received because this could potentially lead to internal ledger errors.

## Enter volume information when receiving goods

Not really a setup step but you need to make sure users know they must enter the volume per pack of stock as it is received. If there is no volume against stock then mSupply will just put it all in the first available box!

Volume per pack for each line of stock is entered at the time stock is received on a:

- **Supplier invoice** in the Volume per pack field shown on the [7.01. Supplier invoices](#) page or

- **Goods received note** in the Volume per pack field shown on the [7.02. Goods receipts](#) page.

You can also edit an existing line of stock to add its volume per pack at any time by using the *Edit stock line* window, as described on the [4.01.05 Items - Stock tab](#) page.

## Getting a suggested pack

To create a suggested pack, go to the *Transport details* of a customer invoice and click on the **Suggest boxes** button shown here:

The screenshot shows the 'Customer invoice' window with the 'Transport details' tab selected. The 'Suggest boxes' button is highlighted with a red rectangle. The window displays various fields for invoice details, including Name, Their ref, Comment, Confirm date, Category, Colour, Invoice, Entry date, Goods received, Requisition, Status, Entered by, and Store. Below these fields are tabs for General, Summary by Item, Summary by Batch, Transport details, Documents, and Log. The 'Transport details' tab contains fields for Order written date, Order received date, Ship date, Expected arrival date, Actual arrival date, Ship method, and Responsible officer. At the bottom of the tab are buttons for Manage boxes, Box selected, Unbox, and Suggest boxes. Below the buttons is a table with columns: Line, Location, Item Name, Quan, Pack Size, Batch, Weight, Exp date, Sell Price, and Boxes. The table contains three rows of data.

Line	Location	Item Name	Quan	Pack Size	Batch	Weight	Exp date	Sell Price	Boxes
4	3D02C	Test item 01 500mg tab	23	1000	ABCD1234	0	31/05/2024	2.13	
5		Test item 02 1mg/1ml inj	20	10	ewq...u678	0	31/07/2026	1.43	
6		Test item 03 1g cap	10	25	ZXCV1234	0	31/08/2025	3.56	

Total Item Weight 0

Print labels

OK & Next Delete OK

mSupply will calculate the suggested pack and display it in a new window like this:

Suggested boxes									
Box	Type	% full	% empty	Item	Pack size	Number of packs	Batch	Expiry date	
	Manufacturer carton	100	0	Test item 01 500mg tab	1000	12	ABCD1234	31/05/2024	
	Manufacturer carton	100	0	Test item 02 1mg/1ml inj	10	10	ewqptyu678	31/07/2026	
	Manufacturer carton	100	0	Test item 02 1mg/1ml inj	10	10	ewqptyu678	31/07/2026	
1	Medium box	100	0	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	2	ABCD1234	31/05/2024	
2	Medium box	100	0	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	2	ABCD1234	31/05/2024	
3	Medium box	100	0	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	2	ABCD1234	31/05/2024	
4	Medium box	100	0	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	2	ABCD1234	31/05/2024	
5	Medium box	100	0	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	2	ABCD1234	31/05/2024	
6	Medium box	80	20	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
				Test item 01 500mg tab	1000	1	ABCD1234	31/05/2024	
7	Medium box	60	40	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
8	Medium box	60	40	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
9	Medium box	60	40	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	
10	Medium box	60	40	Test item 03 1g cap	25	1	ZXCV1234	31/08/2025	

Reject

Accept

The columns in the table display the following:

- **Box:** the name of this box (manufacturer cartons do not have a name since they are not packed in a box, they are ready for shipping as they are).
- **Type:** the type of this box. All manufacturer cartons have the type *Manufacturer carton*.
- **% full:** the percentage of the total volume of the box that is filled with stock.
- **% empty:** the percentage of the total volume of the box that remains empty.
- **Item:** the name of the item.
- **Pack size:** the pack size of this line of stock.
- **Number of packs:** the number of packs of this stock line to be packed in this box.
- **Batch:** the batch of this line of stock.
- **Expiry date:** the expiry date of this line of stock.

The manufacturer cartons are shown first (if any have been detected) and will always be shown as 100% full and 0% empty.

They are then followed by the boxes to be packed. The box name and type is shown for the first line of each box only. Different boxes are separated by a blank line. So, in the example suggested pack shown above, box 1 is a medium box and should have 1 pack of Test item 03 (pack size 25, batch ZXCV1234, expiry date 31/08/2025) and 2 packs of Test item 01 (pack size 1000, batch ABCD1234, Expiry date 31/05/2024) packed in it.
