

# Invoice Authorisation

\*

mSupply provides the feature of subjecting Customer and Supplier Invoices to authorisation. This feature allows a manager to control the processing of invoices and may be set to be allowed only by a restricted user or set of users. <note>Invoices that are subject to authorisation and are unauthorised are held in status 'sg' or suggested status. This means the official invoice can not be printed until the invoice is authorised.</note>

## Configure mSupply for Invoice Authorisation

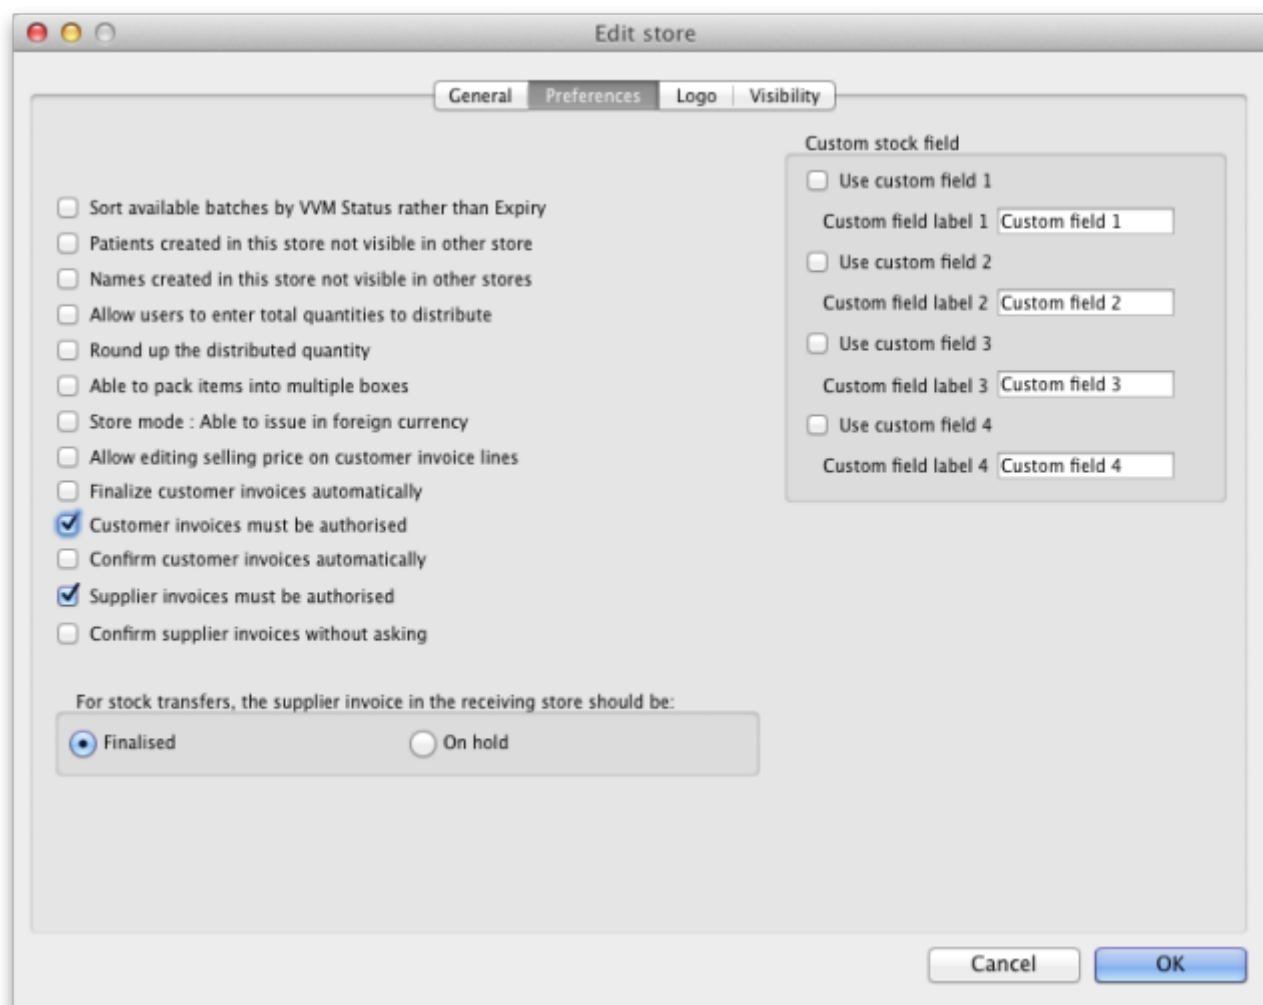

- First give the appropriate user the permission to manage authorisation of invoices.
- Click drop down menu **File> Edit Users...** double click the appropriate user and in the window that appears click on tab **Permissions (3)** and tick to turn on the **Edit Store Details** checkbox and click **OK**.

## Configure mSupply for Invoice Authorisation

- Set Store preferences to allow for authorisation of invoices. Click drop down menu **Special> Store..** click tab **Preferences** and check boxes **Customer invoices must be authorised** and

**Supplier invoices must be authorised.** Click **OK** to return to the Navigator.

The screenshot shows the 'Edit store' dialog box with the 'Preferences' tab selected. The 'General' tab is also visible. The 'Custom stock field' section is expanded, showing four custom fields with labels 'Custom field 1' through 'Custom field 4'. The 'For stock transfers, the supplier invoice in the receiving store should be:' section has 'Finalised' selected.

General Preferences Logo Visibility

☐ Sort available batches by VVM Status rather than Expiry  
☐ Patients created in this store not visible in other store  
☐ Names created in this store not visible in other stores  
☐ Allow users to enter total quantities to distribute  
☐ Round up the distributed quantity  
☐ Able to pack items into multiple boxes  
☐ Store mode : Able to issue in foreign currency  
☐ Allow editing selling price on customer invoice lines  
☐ Finalize customer invoices automatically  
☒ Customer invoices must be authorised  
☐ Confirm customer invoices automatically  
☒ Supplier invoices must be authorised  
☐ Confirm supplier invoices without asking

For stock transfers, the supplier invoice in the receiving store should be:  
☒ Finalised ☐ On hold

Custom stock field  
☐ Use custom field 1  
Custom field label 1 Custom field 1  
☐ Use custom field 2  
Custom field label 2 Custom field 2
