

Contacts...

*

This command from the *Special* menu displays a window where you can edit contacts.

Contacts are usually associated with a name (a customer or supplier), and it is easier to edit such contacts using the “show suppliers...” or “show customers...” command.

If a contact is not associated with a name, you can edit details for that contact using this command.

Buttons in the contact list window:

New: Use to add a new contact.

Report: Presents the Quick report editor window. [See Using the Query Search editor.](#)

Find: Use to find an individual contact

Order by: sort the contacts

Print: *clicking this button will present you with a dialog with two choices:*

- If you click *list* a list will be printed of the records in the window.
- If you choose *labels*, you will be shown the label editor, allowing you to print a set of address labels for the current list of contacts. Note that you can save a particular label layout and then use the *load* command in the label editor to restore your layout.

New: To edit a contact, double-click on the line you want to edit. You will be shown the contact details:

Previous: [Names: Using, adding and editing](#) *Next:* [Merge two names...](#)
