## Merge two names

If you accidentally enter two names into *mSupply* that identify the same organisation, you can use this command to combine them.

Use extreme caution: This operation will move all historical records from the name you delete to the name you are keeping. The operation can only be undone by reverting to a backup copy of your data file (so it is a very good idea to take a backup just before you begin any merging).

Access the function by selecting *Customer* > *Merge two names...* or *Supplier* > *Merge two names...* from the menus.

After selecting one of the options, the following window is displayed:

Merge two n	ames	
Merge two names into one- use with ca	ution!	
Name to keep		
Enter name		
Name to merge- will be deleted		
Enter name		
Note: merging names will affect all historical records for the merged name. Only names		
that have been mistakenly double-entered should be merged.		
should be merged.	Cancel	ОК

Enter the name to keep (type the first few characters of the name and press the Tab key to select it from a list of names that begin with what you typed), and then the name to merge (same way). When you have checked then checked again that the information is correct, click the *OK* button. You will be given one last chance to confirm and then the merge is carried out.

The merge takes all instances of the name to merge in the mSupply datafile, wherever it may appear, and replaces it with the name to keep and then deletes the name to merge.

You can also access this functionality by selecting two names from a list of customers or suppliers and clicking on the *Merge* button at the top:

					Nam	es list				
New	Modify	E Set flags	Print	Find	Order by	<b>X</b> Merge	Labels	Report	Customise	1959/22
Code	Charge	to		Name			Addr	ress 1	Address 2	Custom 1
Autom ( ) 2 ( )	1000011111	10	INTEL CONTENT	0.00011-0.00000			MARKED IN CO.	110011-00000	184108-01	10100100
A8811101	1000011001		CARL STOTAL IN	ACCESSION AND	111100		Inclusion.	APPENDED.	ARE LODGED.	101001100
A0011121	100001-110-	14	NAME OF ALL PROPERTY OF	CONTRACTOR			Internation of		AMAGE AND AND	10100100
AME	1000011001	1.0	ALANT I STATULE.	THREE MAN			Internet I	100 C	AMERICAN PROPERTY.	10100100
ALC: NO	100000-000	10	NUMP MELING	Designation, one	(STREET)			CHARTER	(MALERING)	100,000,000

If you do this you are presented with a different window, where you select which of the two names is the one to keep (in green) and which is the one to merge (in red):

Skeep 🔿	Merge	Кеер 💽	Merge
Code Charge to Name Address 1 Address 2 no. of trans last trans	ANB01/02 ANB01/02 UEOMA HOSPITAL/MATERNITY, U FROM EKWULOBIA DRIVING TO IS ACUATA 0 00/00/00	Code Charge to Name Address 1 Address 2 no. of trans East trans	NEAR EKE MARKET, EKWULOBIA AGUATA 35

Use the pairs of *Keep* and *Merge* radio buttons to select which name is to be kept and which one is to be merged. Make sure you select the right way round then click on the *OK* button and, after a final confirmaiton from you, the merge will be carried out.

You can also merge a name into a virtual store (the store must be the name to keep). This is particularly useful if, for example, you have a customer which you now want to turn into a store to manage their stock more fully. This has the benefit of moving all the transactions connected with the customer into the store so that you don't lose any historical transaction information.

> When you merge a (customer) name with a virtual store you must finalise all transactions belonging to the customer first (mSupply will tell you to do this if you have not already).

In a synchronising system, The merging needs to take place on the primary server, even if the virtual store is 'Active' on a satellite server (see Remote Synchronisation)
