

10.04. Cash register

The **Cash Register** shows all movements of cash in and out, and the current cash balance. It can be used for managing cash reconciliation in a store.

Viewing the cash register

1. Click the **Special** tab in the navigator.
2. Click the **Cash Register** button.

3. The **Cash Register** will open. You can see the **Current register balance** and, for each transaction:

- Who the cash was received from or paid to
- Payment type, where **rc** is a **cash receipt** and **ps** is a **supplier payment**
- Amount received or paid, where a **positive** number is **cash in** and a **negative** number is **cash out**
- Date of the transaction
- Other details such as reasons and comments

Adding or removing cash

All transactions involving cash movement will be *automatically* added to the cash register. For example, receiving payments for prescriptions or making payments of supplier invoices.

You can set permissions to allow users to manually add **cash in** or take **cash out** from the cash register. For example, this may be necessary for depositing cash in the bank.

Permissions for manual cash in/out transactions

1. Go to **Admin > Edit Users** > double click user name.
2. In the **Permissions (2)** tab, check the **Create cash transactions** box to allow the user to perform manual cash in/out transactions.
3. Click **OK** until you return to the navigator screen.

The screenshot shows the 'Edit user' dialog box with the 'Permissions (2)' tab selected. The 'User' field is set to 'user 1 (pass= user1)' and the 'Store' is set to 'General'. The 'Permissions (2)' tab is highlighted with a red box. The 'Create cash transactions' checkbox is also highlighted with a red box.
