# 15.05. Mobile Dashboard set up (before v4.0)

August 2020: The instructions on this page are for configuring mSupply's legacy web dashboard and mSupply Mobile dashboards. mSupply's legacy web dashboard has been superseded by the mSupply Grafana web dashboard.

The following instructions are for setting up dashboards for mSupply versions prior to v4.0.

For mSupply v4.0 and later please refer to the Dashboard set up (after v4.0) chapter of this user guide.

#### Before you set the dashboard up you must:

- know what ports are already in use on the server
- have an appropriate SSL Certificate set up.
- make sure your webserver is currently running.

Sustainable Solutions can help with these.

To setup the dashboard (refer figure below):

- 1. Open File > Preferences > Dashboard
- 2. Check the "We use the web dashboard" checkbox.
- 3. In the **Dashboard web URL** field enter the base URL to reach the dashboard, e.g. http://yoursystem.msupply.org:2048/.

Don't forget the trailing slash (/) otherwise it won't work! If you are running from localhost, use your IP address, e.g. http://l27.0.0.1:8080/ rather than http://localhost/.

4. The URL users type in to the address bar of their browser to access the dashboard will be this base URL with dashboard on the end, e.g.

https://yoursystem.msupply.org:2048/dashboard/

- 5. Tick the reports in the **Is active** column to select them for display on your dashboard.
- 6. You can choose how often these reports are updated by clicking in the **Update Period (mins)** column and entering a number of minutes.

otes	We use the web dashboard					
eports	Dashboard web URL http://127.0.0.1:8080/					
lames	Dashboard report settings		Duplicate			
ender eminders	Report name	Is active	Update period	Last updated time		
atient Medication	Vital medicines in stock	-	(mins) 120	11/09/2016 16:30:47		
rug Interactions	Transactions per store		120	12/09/2016 08:05:48		
rug registration	Top Facilities Supplied		120	12/09/2016 08:05:50		
rinting	Expiring stock		120	12/09/2016 08:05:51		
K and print	This month transactions		120	12/09/2016 08:05:51		
ogo	Total stock value		120	12/09/2016 08:05:52		
spensary mode	VEN items in stock		120	12/09/2016 08:05:53

- 7. Setup which reports appear on which tabs refer Dashboard tabs.
- 8. Setup which dashboard reports each user can access refer The dashboard.

# **Editing dashboard reports**

Double-click a report in the list shown above and the following window will open:

	Dashboard report parameters
Stock_Timor_Vita	1
	Parameters Method Code Json
+	_
New line	Delete line(s)
Property	Value
lat_nw_corner	-8.0279
lat_se_corner	-8.7215
long_nw_corner	125.3258
long_se_corner	125.838210
item_code	MIXCSBVIT
country	Timor Leste
	Cancel OK

If there are any properties shown in the list, these can be edited to change what is displayed.

To edit a property or value, click once to select the row, and then click again in the appropriate cell to edit it.

To add or delete a row use the **New line** and **Delete line(s)** buttons at the top of the window.

In the example shown in the screenshot above (a map report), the coordinates of two of the map corners and the item code of the item whose stocks will be shown on the map have been entered. Note that if you add extra properties to the default reports they'll be ignored.

See the section below for details of the various dashboard reports available and the settings that can be edited.

## What the dashboards show and what can be edited

There are several built-in dashboard reports that everyone can use. Here's what they show and what properties can be edited to change what they show:

Report name	Property	Value		
VEN items in sto	<b>ock</b> : Shows stock on hand of	each items that belongs to the VEN (Vital, Essential, <i>item_ven</i> ) Report format : Table		
	store_code	store code if empty then default store is chosen		
	ven_category V,E,N or E,N or Vetc will filter the VEN item all visible items for the store are chosen			
	5 5 7	ault currency, showing the total value of the stock you rd for. ( <i>Method: dashboard_rep_total_stock_value</i> )		
	None	None		
		rt of the number of purchase orders, goods receipts, onth. ( <i>Method: dashboard_rep_month_transacs</i> )		
	None	None		
		onthly number of all items expiring within the year, : dashboard_rep_expiring_stock)		
	None	None		
	st 90 days. Shows the value o	your store to which you have sent the greatest value if stock for each customer. ( <i>Method:</i>		
	None	None		
-	<b>r store</b> : Shows a table of all rd_rep_month_transacs)	transactions per store within the past 7 and 30 days		
	store_tags	A comma-separated list of tags - or omit this parameter if you want to show stock for all stores.		
1	<b>ock</b> : Shows a bar graph of th ity. ( <i>Method: dashboard_stor</i>	e percentage of medicines of the chosen category in e_stock_percent)		
	ven_category	v or e or n if you want to include items that are Vital or Essential or Necessary		
	user_field_4	TRUE if you want to include items with this field checked		
	user_field_7	TRUE if you want to include items with this field checked Note that the labels for fields 4 and 7 may be different, as they are set up in the mSupply preferences (misc tab)		
	critical_stock	TRUE if you want to include items with this field checked, false for all items		
	store_tags	entering healthcentre will only include stores with the "healthcentre" tag		
	representing the amount of s	a specified, with an "X" if the facility is out of stock of stock of stock on hand. ( <i>Method:</i>		
	lat_nw_corner	the latitude of the North-West corner of the map		
	long_nw_corner	the longitude of the North-East corner of the map		
	lat_se_corner	the latitude of the South-East corner of the map		
	long_se_corner	the longitude of the North-East corner of the map		
	item_code	the item code of the item to display		
	country	compulsory parameter		
	store_tags	A comma-separated list of tags - or omit this parameter if you want to show stock for all stores		

Report name	Property	Value
		last connection date and current mSupply version of
each sync site. (Me	ethod: dashboard_report_lasi	
		None
	and received statistics: Sh day. (Method: dashboard_re	ows number of records sent and received by each syc <i>port_sync_stat</i> )
	None	None
Stock_for_catego	ory_1_stores_by_item_list:	Shows (Method: -)
	None	None
items. Will show th	ne current percentage, and p Method: dashboard_rep_in_s	
	store_id	the ID of the store you're interested in, or no value for all stores
	critical_stock	TRUE if you want to include items with this field checked, false for all items
	Output: use the type "time_	series_chart"
	<b>Transactions</b> Shows how r nth ( <i>Method: dashboard_rep</i>	nany transactions of each type the chose store has
	store_name	the name of the store which you are interested in, or no value if you want all stores
	<b>s Month</b> : Shows items issue w_storeCol_usage)	d by the facility within the last 30 days. ( <i>Method:</i>
	store_tag	include stores with this tag
	master_list	include items on this master list
	period	30 ( currently only 30 days is supported)
		le of items in rows and stores in columns, with the h cell. ( <i>Method: dashboard_rep_stk_StoreCols_Itm</i> )
	store_code	store code attached to the store. multiple stores can be specified by adding more parameters that begin with store_code (e.g. store_code2). The item_code parameter must be specified if using store_code
	item_code	items whose code matches this code (append "@" for a "starts with" search)
	master_list	selected master list of items. Category1_description must be specified if using a master_list
	Category1_description	Items with this category1
	k Transfers: Table of unfina nod: dashboardReportUnfina	lised stock transfers (between mSupply stores) for lisedStock)
	store_tags	(optional) A comma-separated list of tags - or omit this parameter if you want to show transfers for all stores.
	days_older_than	(optional) show only transactions that are older than this value (days).

If you can't make a dashboard report that does what you want then please speak to us, it's usually a fairly simple matter for us to create one for you.

August 2020: The remaining instructions on this page are for

configuring mSupply's legacy web dashboard. This may still work, but is no longer supported as it has been superseded by the mSupply Grafana web dashboard. The instructions are left here for historic reference only.

# **Dashboard tabs**

You set up Dashboard tabs which will display on your dashboard. Dashboard tabs are "containers" for one or more dashboard reports. To edit them go to *File > Preferences* and click on the *Dashboard tabs* tab on the left hand side:

0	Pre	ferences	
Quotes	🛨 📼		
Reports			
Names	New line Delete line(s)		
Tender	Internal name	Tab name	
Reminders	Management1	Stock	
Patient Medication			
Drug Interactions			
Drug registration			
Printing			
OK and print			
ogo			
Xspensary mode			
HIS			
.og			
This Computer			
lackup			
lackup 2			
imail			
Server			
Synchronise			
Customization			
Moneyworks			
FrontlineSMS			
LMIS			
DAP			
Dashboard			
Dashboard tabs			
Stock			Cancel

To add a tab click the **Add** button. To edit a tab, double-click it. You will be shown a window for editing a dashboard tab:

				New	Dashboa	rd 1	Tab		
Internal	nam	ne Manageme	entl			Та	ab name Stock		
New line		Delete lin	e(s)						
Row		Column		Report Title	Туре		Width	Report	
Row 1		Column 1		Vital medicines in stock			6:	Vital medicines in stock	•
Row 1		Column 2		Expiring items	line_chart		6 :		
								Cancel	ОК

Now you add reports that will show on this tab.

### Understanding rows and columns

Take this example dashboard tab:

• The tabs themselves occupy their own space on the left of the window- they aren't considered

- when laying out the dashboard
- The first row has two reports- each report takes up half the row. So for the first report:
  - Row 1, Col 1, width 6 ("12" means it takes up the full width of the cell it is in- "4" would mean it would take up 1/3 of the width)
- For the report at the top right:
  - $\circ$  Row 1, Col 2, width 6
- For the map
  - Row 2, Col 1, width 12
- The next two reports are on the same row, but are divided into 5/12 and 7/12 of the width of the window, so we put them in the same cell but change the width settings:
  - Row 3, Col 1, width 5
  - $\circ\,$  Row 3, Col 1, width 7

#### To add a report to a dashboard tab

Click New Line to add a new report to the tab. Then edit the values in each column

- Row: The row it will be in
- **Column:** The column within the row- set to "1" if you don't have multiple reports on this row.
- **Report tite:** The title that will show in the Orange heading bar for the report. Note that the same report can display different information depending on the parameters you set for that report- hence the need for the ability to customise report names
- Type: You'll need to know the appropriate type for the report you're displaying. The options are
  - bar\_chart
  - $\circ$  table
  - $\circ$  pie\_chart
  - $\circ$  time\_series
  - map
  - line\_chart
- Width: The fraction of the cell width in "twelfths" that this report will take up ("6" will make it take up half the cell width)
- **Report:** Choose the report name from the drop-down list of available reports

#### Add a dashboard tab to a user's dashboard

This is the final step in setting up dashboards: once the tabs have been setup you have to choose which users will see which tabs. You do this in individual users' settings. See managing users for instructions on how to do this.

Some of these dashboard reports can be used for mSupply Mobile. Users do *not* need to be set up to have access to mSupply Mobile dashboards. The mSupply Mobile store will see the dashboard reports provided that on the mSupply central server:

- The mobile: Uses dashboard module store
- preference is turned on for the store
- The report has been configured for display on mSupply

Mobile stores
