

6.05. Ordering from multiple suppliers

The multi-store purchase order will enable you to create a purchase order that includes lines for many stores at once.

Limitations

- You can only create a multi-store purchase order in supervisor mode.
- You can only create a multi-store purchase order as a blank purchase order. You cannot create a calculated multi-store purchase order (yet;-)).
- You cannot use multi-store purchase orders to order from another store in the mSupply system.
- For a specific item, you cannot order different pack sizes for different stores. For any item, all stores must have receive the stock in the same pack size.

Set up

To make a store available for multi-store purchasing, you will need to go into the store preferences and add a custom field labelled `canBeIncludedInMultiStorePOs` with its value set to `true`:

1. Log into any store
2. **Special > Show stores...**
3. Double click on the store name in the list
4. Go to the **Custom fields** tab
5. Add a new line that looks like this (be VERY careful to get the spelling of `canBeIncludedInMultiStorePOs` correct. It is case sensitive):

How it works

Permissions

To be able to create a multi-store purchase order the user must have permissions to:

- Log in to [Supervisor - All stores](#)
- Create a purchase order in **Supervisor - All stores** - refer [The permission tabs](#)

Creating a new purchase order

To create a new multi-store purchase order

1. login to [Supervisor - All stores](#)
2. Choose **Supplier > New blank Purchase Order.**

New Purchase Order line...

General Usage Quotes Receipt history Ledger

Item: Amethocaine Sterile Eye Drops, 0.5% (Individual Applicators), Pkt/5 101800

Pricing for this item

| Price before discount | Discount (%) | Price after discount | Line total |
|-----------------------|--------------|----------------------|------------|
| 1,000.00 | 5 | 950.00 | 23,750.00 |

| Store | No of packs | Pack size | Total Qty | Price extensi... | Requested delivery date | Expected delivery date |
|---------------|-------------|-----------|-----------|------------------|-------------------------|------------------------|
| Badili AMS | 0 | 1 | 0 | 0 | 2019-01-15 | |
| Hagen AMS | 10 | 1 | 10 | 9500 | 2019-01-15 | 2019-03-31 |
| Kokopo AMS | 0 | 1 | 0 | 0 | 2019-01-15 | |
| Lae AMS | 15 | 1 | 15 | 14250 | 2019-01-15 | 2019-02-28 |
| Wewak AMS | 0 | 1 | 0 | 0 | 2019-01-15 | |
| Totals | | 25 | 25 | 23750 | | |

Buttons: Cancel, OK, OK & Next

- If you put a price per pack and a discount, the discounted price per pack will be calculated and applied to each line.
- For each store, you can specify the number of packs to order.
- The total quantity will be automatically calculated.
- You can change the requested delivery date and add an expected delivery date either manually or through the calendar icon on the column to the right.
- When you click OK, only the lines for which the number of packs is not 0 will be included in the purchase order.
- The other tabs are the same as normal purchase orders with two exceptions:
 - **Usage tab** When adding a line for a normal purchase order, the usage is calculated for the currently logged in store only. For multi-store purchasing there is now a dropdown list that lets you choose for which store you want the usage to be calculated.

- **Ledger tab** There is also a dropdown list in the ledger tabs, where you can select the store for which you want the ledger to be displayed.

Editing a new purchase order

To edit a multi-store purchase order line

1. login to [Supervisor - All stores](#)
2. Open the purchase order
3. Double-click on the line you want to edit. All the lines pertaining to the same item will be loaded.

Here's an example of a multi-store purchase order opened in supervisor mode:

If you click on the first line of the “Acryliser, Electric”, all five stores’ order lines for that item will be loaded.

- You can change the pack size, the price, the discount and the requested and expected delivery dates.
- If you put 0 as the number of packs for a line that had previously contained a quantity, this line will be deleted when the user clicks the OK or OK & Next button.

As with normal purchase orders, when a purchase order has been confirmed it is no longer possible to go back and edit the order lines.

Viewing multi-store POs when logged in to the receiving stores

When logged in to the receiving stores, multi-store purchase orders can be identified by an asterisk (*) after the supplier name in the purchase order display list.

- A multi-store purchase order appears in the purchase order list of each store for which goods have been ordered.
- When viewed in a particular store, only the lines that belong to that store will be displayed - see example:

Furthermore, the displayed lines will not be editable. To edit the lines, you will need to accessing it in supervisor mode.

Goods receipt

Good receipting will function as normal (refer [Goods receipts](#)) but only the lines pertaining to the store you are currently logged in to will be available.
