

Customer Ordered Shortfall Report

*

When you choose *Report > transactions* and then select *Customer ordered short fall report* , the transaction report like the one below will be produced. This report is used only for sales to customers.

Note that for this report to make sense the preference *Allow placeholder lines on customer invoices* must be checked, and the preference *Delete placeholder lines when confirming invoices* must be unchecked.

The screenshot shows the 'Transaction report' configuration window. The 'Type of report' list includes options like 'Cross-tab: items in rows, quarters in columns, quantity in cells' and 'Customer ordered shortfall report' (which is highlighted). The 'Date range' section has 'Confirmed Date' selected and dates set to '2/04/2015'. The 'Transaction type' section has 'Sales to customers' selected. The 'Transaction category filter' is set to 'Description equals'. The 'Name filter' section has 'Name contains' and 'and Category 1 is' and 'and Category 2 is' and 'and Customer group'.

From the report window, select the desired parameters and click *OK* . An example report is shown below.

Customer ordered short fall report National Medical Store

Date range :01/01/2007 to 17/01/2007, Item name contains @ma@Item category includes PHARMACEUTICALS

Transaction Type equals customer, Name code contains @@@, Mode: Both

Setting up mSupply to use the Customer Ordered Shortfall report

For this report to be used, you need to do the following

- Choose *File > Preferences > Invoices2* and ensure “Delete placeholder lines when confirming invoices” is **not** checked.
- Staff must enter requested amounts on invoices as placeholder lines.
 - For example, a customer orders 1000 x Paracetamol syrup 60ml. You have 800 in stock, so you add 800 to the invoice, and you also add a placeholder line for 200 bottles.
- You need to decide whether to (and if yes, how) to use the backorder system. If customers can rely on you to record shortfalls as backorders, then they will no need to re-order the shortfall in subsequent ordering cycles, as they know you will deliver it when available.
