# **ABC** analysis

| ABC analysis ×   |
|--|
| Number of items to include in report 50<br>Date Range<br>From 2/04/2015 To 2/04/2015 Today           |
| Report on names whose  |
| Name   contains  |
| Item filter  |
| Item code 💌 starts with 💌  |
| and 💌 category is Don't Care 💌   |
| and  VEN Category Don't Care   |
| and  v department is Don't care  v   |
| Which mode?    Both modes Store mode Dispensary mode   Exclude Ad hoc and non stock items  Cancel OK |

This report will rank the items based on the value sold in the period specified. Sometimes such a report is referred to as an "ABC" analysis or a "pareto" analysis. Statistics show that 20% of the items supplied by an organisation usually generates 80% of the total value of sales. Therefore, it is useful (and wise!) to concentrate first on the 20% of items that are most important. This report makes it easy to do just that.

You might be interested in what Wikipedia has to say about ABC analysis

You need to enter the following information:

Number of items to include in report: Enter the number of items to be included in the report.

**Date range:** Enter the dates you wish here. Each item will have its "analysis" field updated with the total value of sales during the period specified.

**Filters:** Should you wish to apply filters to the report, three are available - for items, categories and departments.

**Which mode:** You can choose store mode, dispensary mode or both modes of transactions for inclusion in the report.

**Exclude Ad Hoc and non stock items:** If you check this box then Ad Hoc and non stock items will not feature in the report.

The report lists the number of items specified, ranked by value of sales, starting with the highest. The value of sales and the percentage of the total value are also shown. Note that the total value is the total for the items in the report, not the total sales for all items. If you want to report on the total for all items, set the *Number of items to report on* to a number greater than the number of items in your data file (Note that this may make the report very long, but you can choose just to print the first few pages if you wish).

### **Management summary**

This report is designed with line managers in mind, or other people who want to "keep their finger on the pulse" of their organisation but are not interested in the fine detail!

You'll be shown a window where you can choose a date range for the report:

| se Management summary   | × |
|---|---|
| Management report   | • |
| From 08/04/15 To 8/04/2015 Today -  |   |
| <ul> <li>Include a section on expiring items</li> <li>Include Inventory Adjustments</li> <li>Preview on screen before printing</li> <li>Open report in Excel</li> </ul> |   |
| Cancel OK   |   |

The report provides the following information:

- The total value of stock on hand
- The 10 items with the largest stock value
- The 10 items with the largest value of supply to customers in the date range chosen.
- The 10 suppliers from whom you have purchased the most in the date range chosen.
- The 10 customers to whom you have supplied the most in the date range chosen.
- If you check the "Include section on expiring items" checkbox, a section will be included that lists:
- The cumulative liability for expiring items for each of the next 12 months.
- The 12 most valuable expiring items (or at least batches of particular items)

### Preview on screen before printing

Check this box if you want to view your report on screen first.

Open report in Excel

Check this box to view the report directly in your chosen Spreadsheet program.

# **Quotation summary**

|---|--|
| Report on<br>All quotations Preferred quotations                      | Group together by:<br>Supplier<br>Item   |
| Report on suppliers whose   |  |
| Name 💌 contains   | ▼  |
| and 💌 Category 1 💌  | is Don't care 💌                          |
| Item filter<br>Item code 💌 starts with                                | •  |
| and 🔻 catego  | ny is Don't Care 🔻                       |
| and 🔻 VEN Categ   | ory Don't Care 💌                         |
| and The department  | nt is Don't care 💌                       |
| Date filter<br>Created or modified date ( 1/01/2015 To 8/04/2015 From | Quotation valid date This year Cancel OK |

There are two options in *Report on* section, namely: *All quotations* and *Preferred quotations*, and there are two options in *Group together by* section, namely *Supplier* and *Item* 

All quotations shows the quotations in which Preferred is set to "true or false".

Preferred quotations shows only those quotations in which Preferred is set to "true".

*Supplier* option displays the quotation report on the basis of supplier. The quotations for the items related to a particular supplier are listed along with that supplier.

*Item* option displays the quotation report with the items arranged in alphabetical order along with the corresponding supplier's name.

In addition there are filters allowing you to narrow your search further by:

- limiting the report to suppliers meeting your specified criteria e.g. the supplier's name code may be entered, so the resulting report will display only quotations from that particular supplier.
- specifying criteria relating to the item by choosing from the many options in the drop-down boxes as shown below:

| tem code                               | starts with      | •                   |   |
|--|------------------|---------------------|---|
| Item code                              |                  | De la Cara          |   |
| Item name                              | category is      | Don't Care          | - |
| ABC category<br>Default shelf location | code EN Category | Don't Care          | - |
| Flag                                   |                  |                     |   |
| user_field_1                           | department is    | Don't care          | - |
| user_field_2                           |                  |                     |   |
| user_field_3                           |                  |                     |   |
| user_field_4                           |                  |                     |   |
| Essential Drug List                    |                  | uotation valid date |   |
| Critical stock                         |                  |                     |   |
| Normal stock                           | 2015 Thi         | s year              | - |
| SMS code                               | 2013             | sycal               | • |

There is an additional filter, the Date filter, allowing you to specify the dates on which the Quotations you are examining were created or modified, and the radio button toggles display of the quotations' expiry date (*Quotation valid date*) on or off.

# Sync report

This report allows you to to track remote site activity. It is available from the special menu. The report is only visible in the menu if you're on a primary server (the main server in a sync system).

### **Debtors and creditors**

The following reports are available:

| Debit/ | /credit             |
|--------|---------------------|
|        | Debtors             |
|        | Aged debtors        |
|        | Customer statements |
|        | Creditors           |
|        |                     |

Select the required report by clicking on it.

## Debtors

This report will produce a list of all debtors. *mSupply* uses an open-invoice system of accounting for debtors, so the outstanding amount for each debtor is displayed; for debtors with more than one invoice outstanding, the amount displayed is the cumulative total of all outstanding invoices.

Note that the total outstanding on invoices is not reduced for any previous overpayment by a customer, but this is listed in a separate column in the report.

To remove overpayment amounts from the system, choose *customer* | *new payment...* and enter the name of the customer with an overpayment. You will be asked if you want to use the overpayment amount for this payment. Choose *use*, then allocated the overpayment to outstanding invoices.

### Creditors

# Aged debtors

# **Customer statements**

You will be presented with a window to find customers.

| <b>1</b> 2     | Customer statements | x |
|----------------|---------------------|---|
| Find<br>name - | whose name          |   |
| Open in Excel  | Cancel Find         |   |

If you want a report for all customers, leave the entry field blank. Click *OK* and a report will be produced for any customers who match the criteria entered. Note that customers with no amount outstanding will not have a statement printed for them.

### **Transport report**

This report allows you to print information about the transport details for a range of invoices.

First you are shown a window where you can select a date range and choose to report on only invoices supplied by a particular method, by a particular responsible officer, or to a particular name or names.

| Transport report   |
|--|
| Date range<br>From <mark>08/04/15</mark> To <mark>8/04/2015 Today ▼</mark> |
| Report on names whose Name   contains                                      |
| Search Criteria<br>Responsible Officer All<br>Ship Method All              |
| Which mode?<br>Both modes  |
| Cancel OK  |

Click "OK" to run the report. Note that transport details can only be entered on customer invoices if you have checked the "We use box numbers" option in the Preferences

### **Prescriber report**

This report (v1.93 onwards only) allows you to view the total value, mean item value and item count for prescriptions dispensed for each prescriber.

You will be shown a window with the normal date range options, and the option to report only on prescibers whose type field is set to a certain type.

Click OK to proceed.

The window that appears is the Transactions report, but you will see that the *Prescribers report* is highlighted.

| 4  |   |
|--|---|
| Type of report   |   |
| Report   |   |
| Totals for each item broken down by name<br>Totals for each name broken down by item<br>Totals for each item department<br>Totals for each item grouped by day<br>Totals for each item grouped by month<br>Totals for each item grouped by item description<br>Totals for each item broken down by packsize  | ^ |
| 2 Period comparison by item category   |   |
| Prescriber report<br>Cross-tab: items in rows, names in columns, quantity in cells<br>Cross-tab: items in rows, names in columns, value in cells<br>Cross-tab: items in rows, days in columns, quantity in cells<br>Cross-tab: items in rows, days in columns, value in cells<br>Cross-tab: items in rows, months in columns, quantity in cells<br>Cross-tab: items in rows, months in columns, value in cells | ~ |

As usual, the report options window is shown where you can choose the destination and set headers and footers.

### **User activity totals**

This report was initially made for use in dispensing situations where you want a quick count of the number of prescriptions and items issued in a day. However, it is also useful for getting a quick view of workload for a month or a year in store mode. This report gives the number of supplier invoices (or prescriptions) and the number of stock lines on them, reported by user.

Choosing this menu item shows a window like this (once you have selected a date range).

| 0                      |                             |
|------------------------|-----------------------------|
|                        |                             |
| No. of<br>transactions | No. of<br>transaction lines |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
| 13                     | 46                          |
|                        | 89                          |
| 40                     | 377                         |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
|                        |                             |
| 6810                   | 44481                       |
|                        | No. of<br>transactions      |

You can drop down to view data by clicking on the green arrows. Alternatively, you can click on the printer icon on the bottom right and export the full list to Excel.

#### Date range

You can either enter dates manually or choose from the drop-down list to the right of the date fields.

#### Time range

Enter times here in 24 hour format (e.g.. 9:00 in the "from" field and 17:00 in the "to" field. Leaving these fields on 00:00:00 will calculate for the whole day.

To calculate totals, click the *Show* button. If there are a lot of transactions to evaluate, a progress bar will be shown.

Click the OK button to close the window when you are finished.

# **Backorder report**

This report shows a list of Items that are not available or insufficient stock is present to meet the requirements of the order placed by the customer. Information about the item code, item name, current stock, customer code, b/ord quantity is displayed.

If you are running a backorder system this gives you a quick way to check if backordered items are now in stock so they can be supplied to customers.

# Suggest price list additions

Note: the price list menu items are for those organisations that produce a price list or price indicator. (It is useful to call your publication a "price indicator", as it implies the published price is a guide, and not a fixed price). You are asked to specify the number of transactions and the number of months (e.g. 2 transactions in the last 3 months) that would make an item eligible for inclusion in the price list. A search is performed using the criteria you enter, and a list of items is shown that meet the criteria but are marked as not being in your price list. You can double-click on items in the list and click their "price list" check box to add them to the price list.

# **Update price list**

This item updates the prices of items from the item line on hand that has the most stock.

Only items whose "price list" check box is checked are updated.

Each line of stock is evaluated to determine which stock line you have the most of. That line is used as the indicator price for its item.

Note that if an item has no stock, then the price for that item will not be altered.

It is a good idea to run the "suggest price list additions" report first.

# **Price list**

Only items that are marked as included in the price list (**Item** > **Misc** tab) are placed in a report, whether or not you have any in stock.

If you wish to export to a text file, choose "save to disk" in the report options dialog that is shown.

The exported file has fields separated by tabs and records separated by returns. The field order is:

- Item
- pack size
- price.

If you wish to include different information, you can create a custom report to do this.

mSupply documentation wiki - https://docs.msupply.org.nz/

### **Location report**

This report is available in version 1.96 and later.

This report lists the location description, type, capacity, used volume and percentage available. Choosing this menu item shows you the location report filter options widnow as below:

| Report on location whos | e      |     |               |
|-------------------------|--------|-----|---------------|
| Code 💌                  | equals | × [ |               |
| Filter location by      |        |     |               |
| Location type           | None   | ×   |               |
| Location Summary        |        |     | Open in Excel |

The report may be restricted to certain locations by using specific search criteria. Choose either "Code" or "Volume" from left drop-down list is . The centre drop-down list allows you to choose a comparitor.

| equals       | ~ |
|--------------|---|
| equals       |   |
| greater than |   |
| less than    |   |

You have to make an appropriate entry on the right-hand field. Leaving the field blank means no filter will be applied.

### Location type

It allows you to choose a location type. You can select the one from the drop-down list on the right side. The graphic of location type is shown below.

| None   | × |
|--------|---|
| None   |   |
| DDA    |   |
| I COOL |   |

For example, you can specify the location type"COOL" to show only refrigerated locations.

Check the "open in Excel" checkbox if you wish to directly open the saved report in Excel (or any installed spreadsheet).

Click the OK button to run the report.

### **Manage reports**

Choosing this item shows a list of built-in reports and any custom reports which have been designed:

| Quick search     |            | Cre | ate report Man | age reports |         |      |        | -         |
|------------------|------------|-----|----------------|-------------|---------|------|--------|-----------|
|                  |            |     |                |             |         | Edit | Delete | Duplicate |

|                  |            |     |                |             |         |      |        |           |
|                  | -          |     |                |             |         |      |        |           |
|                  |            |     |                |             |         |      |        |           |
|                  |            |     |                |             |         |      |        |           |
|                  |            |     |                | -1          |         |      |        | -         |

The built-in reports may well be sufficient for your needs, but mSupply's versatility allows you to manage the reports to meet any specific requirements you have.

### **Options in the Report Management window:**

#### **Delete selected reports**

Report(s) no longer required may be selected and deleted from mSupply

#### Duplicate report

Should one of the built-in reports not quite meet your needs, you have the opportunity to create a duplicate of that report, and then modify it to meet your needs. The first step is to select the closely matching in-built report; in our example we'll use the *expiring\_items\_date* report, then click on the *Duplicate report* button;

|              | Duplicate report         |
|--------------|--------------------------|
| Report type  | Quick report             |
| Custom name  | expiring items date      |
| Permissions  | All                      |
| Type of form | Patient Details          |
| Comment      |                          |
|              |                          |
|              | Make this report default |
|              |                          |
|              | Cancel OK                |

the window that appears has already selected a name for your report, using the name of the in-built report prefixed by "*my*\_"; you may change this name should you wish. The Permissions drop down list allows you to specify users having access to your report; the options are *All users*, or *Only me*. Should you wish your report to become the default one rather than the in-built report, then check the *Make default* checkbox. When you click on OK, the report you have just created now appears at the foot of the list of reports from the item on the menu Report>Manage reports.

#### Edit report

The editing of reports using the powerful editor has been extensively covered earlier in this section.

Using the report editor is complex, but it has the potential to produce a wealth of useful information. Contact Sustainable Solutions for a link to download a separate manual on the subject.

Note that in a multi-user installation, changes you make to a report will affect all users, so don't change a report without some forethought.

#### Add report

Click on this button, and the following window appears

|              | Add             | l report  |      |
|--------------|-----------------|-----------|------|
| Report type  | Pagepro         | 0         |      |
| Custom name  |                 |           |      |
| Permissions  | All             | 0         |      |
| Type of form | Patient Details | 0         |      |
| Comment      |                 |           | ]    |
|              |                 |           |      |
|              | Make this repor | t default |      |
| Report file  | Locate report   |           | Open |
|              |                 | Cancel    | ОК   |

#### **Revert selected reports**

This button allows intrepid souls to save face by undoing the damage they have done to a particular report! The report that was installed with mSupply will be reloaded from the disk, and any changes you have made to the version stored with the data will be discarded.

#### **Revert all**

This button returns all in-built reports to their original state when you installed mSupply; exercise caution when using it. Custom reports which you have designed are not affected.

### Save selected reports

All reports are automatically saved by mSupply in the default folder. There may be occasions when you wish to save one or more reports on a removable storage medium - e.g. a pen drive - and this button allows you to do this; a window appears allowing you to specify the location in which you wish to save the selected reports.
