

18.04. Adding supplier responses to a tender

Suppliers respond to your invitation to respond to a tender with quotations. To process a quotation from a supplier, open a tender (choose **Supplier > Show Tenders...** from the menus and double-click on the tender in the list) and go to the *Choose suppliers and edit responses* tab:

[illegible]

Double-click the supplier name you want to enter a response for. The *Edit Quote* window will appear:

What you do from here depends on whether you want to enter the supplier responses manually or import them from a spreadsheet.

Entering responses manually

The **Date sent** field may be edited if necessary. You should enter the date the supplier responded, and in the **Valid till** field, the expiry date of the quotation. Also, enter the reference that the supplier is using for their own records (to be quoted in future correspondence) in the **Their reference** field, and, importantly, the currency in which the supplier has responded (on the *Edit Quote* tab). If you have previously set a default currency for this supplier, this drop-down list will already be set to that currency. Otherwise, your own default currency will appear.

The freight charge per cubic metre [m^3] should be entered; if the volume of each item's pack is known, this can also be entered (at a later stage), allowing a more accurate total cost of each item to be evaluated.

Multiple currency tender quotations

A quotation may be received from a supplier which has used one currency for some items, and another currency for others; or has submitted more than one quotation for the same item, each one in a different currency (e.g. Euros and US dollars). Should this occur, it is strongly recommended that you process the quotation as two or more separate quotations, each one restricted to a single currency. That is, enter the supplier twice in the list of suppliers, then add a comment to the quotations to distinguish which quotation is in which currency. We have designed mSupply like this so

that when Purchase Orders are created, a single Purchase Order only uses one currency. Mixing currencies on a Purchase Order is likely to cause confusion and errors.

Adding quotation lines

Now you can add the supplier's quotation line by line. On the *Edit Quote* tab, click on the **New line(s)** button. A window will open showing you a full list of all the items on the tender:

Select from the list all the items you want to enter quotes for. You can use the usual Control+click (Cmd+click on Mac) to add/remove an item to your selection, Shift+click to add/remove a range of items from your selection or Control+A (Cmd+A on Mac) to select all items. Now click on the **Use** button and all the items you have selected are added to the quotation with zero cost. In this example we chose to add the first 5 items in the tender:

[illegible]

To add the same item twice to a quotation from a supplier, click the **Add lines(s)** button and choose the item a second time. You will be shown a warning that the item is already on the quotation, and be asked if you want to add it again. You might need to do this if the supplier has supplied two prices for the same item based on differences in packaging or other specifications. Note that if you entered an item twice in a single tender to account for such differences, it will appear twice in the list and you won't need to carry out two selections.

In the event that the currency of the quote from the supplier is not the same for each line, mSupply allows each line's currency to be edited, and the appropriate one selected.

Entering prices for each quotation line

When you have added all the items you want to the quotation, it's time to add the prices and other details of the supplier's quotation. To do this, double-click on the first quote line to open the *Edit Tender Response Item* window:

The tender details are shown at the top.

In the fields below, enter the price and other details the supplier has provided. Enter as much as you can because you'll use this information when comparing quotes from different suppliers.

General

The Date, Item and Supplier fields are filled in automatically

Manufacturer

Type the first few characters of the manufacturer's name and press the Tab key on the keyboard to see a list of matching manufacturers. Select the one you want.

Price

The price you enter is the price for **ONE PACK** of the pack size shown in the **Pack** field.

Valid until

The date this quote will expire.

Pack

The pack size (number of single items in one pack) this quote is for. This value should be the [preferred pack size](#)

Currency

The currency the **Price** is in.

Rate

The rate used to convert the **Currency** of this quote line to the currency you are using in your datafile.

Rate to use

You can use a different rate to convert the **Currency** of this quote line to the currency you are using in your datafile if you like - just enter it here.

Disqualified

Check this if the quote line is disqualified for any reason (excluded manufacturer, for example).

Preferred

Check this if this is the quote you want to accept as the best - see later sections on comparing quotes from different suppliers for more on this.

Cost Local/Pack

The quoted cost per pack in your local datafile currency when converted from the quote line currency using the rate entered in the **Rate to use** field. This number is calculated; you can't enter it.

Evaluator comment

Enter anything you need to remember or need others to know when evaluating the quote and comparing this quote with those from other suppliers.

Price break

You can add price break information that the supplier has provided you in this *Price break* section. A price break is a reduction in price when you order over a certain quantity.

Price Break quantity

This is the number of items at which the reduction occurs and the **Discount** will apply.

Discount

This is the percentage reduction that will apply to the price entered in the **Price** field once the **Price break quantity** is reached.

Freight

If you are calculating freight based on volumes or weight, or using a freight factor, enter that information in this section.

Volume per pack

This is the volume, in cm³, for the [preferred pack size](#).

Freight factor

Freight for preferred pack

This is the cost of freight for the [preferred pack size](#). This will be added to the Price per [preferred pack size](#).

Freight notes

Any notes.

Supplier

Enter any extra details about the supplier in this section.

Supplier's code

The Supplier's code for the item. This will appear on the Purchase Order. This field will be filled in automatically from a tender downloaded from the [Health Supply Hub](#).

Supplier bar code

The Supplier's bar code for the item. If this is entered correctly, then the correct item can be picked up by a barcode scanner when receiving the goods.

Exp date

The expiry date for the stock of the item.

Delivery time

How long it will take for the supplier to deliver the stock.

Method of delivery

A free-text field to record the method of delivery (e.g. air, sea, sea and land etc.). This field will be filled in automatically from a tender downloaded from the [Health Supply Hub](#).

Supplier comment

Any comments the supplier has made about this line or the stock they will supply.

When you have finished entering details for the quote for this item, click on the **OK & Next** button to move to the next item or **OK** to save the current quotation line, close the window and go back to the *Edit Quote* window.

When you have finished adding all suppliers' quotes to the tender we recommend that you set the tender's status to confirmed (on the *Edit tender* window at the top).

If you're finding that entering all the supplier's quotes is too much work then there's help for you! The [Remote tender module](#) is what you need. All the suppliers enter their own

quotations to the remote tender module and, when the tender closing date has passed, you can simply download them to mSupply. See [Uploading and downloading web tenders](#) for details and contact support@msupply.org.nz if you're interested.

Deleting an item from a supplier's quotation

If you wish to delete an item from the quotation, click on the line to highlight it, then click the **Delete line** button. Note that this action deletes the selected item from the quotation only, not from the tender!

Reference documents tab

This is used for saving documents which refer to the Supplier's quote, not the whole tender - use the Reference documents tab on the *Edit tender* window to do that (see [Reference documents](#) for more details). You might want to use this to save a scanned version of a paper copy of the supplier's quotation, for example.

From supplier: ACME Pharma

Their reference:

Show:

File Name	Created by	Created on	Saved on	Version no

Upload document button: Click on this to store a document with the quote. You will be shown a window allowing you to browse to the required document. Double-click on the document or click on it and click the **Open** button to add it to the quote (called "uploading" it). Once it has been successfully uploaded it will appear in the list of documents below the buttons.

Delete document button: Click on a document in the list to select it and click on this button to delete the file and remove it from the quote. You will be asked to confirm the deletion.

Download document button: This will allow you to save one of the files in the list to your computer (called “downloading” it) so that you can view or edit it. Click on the file you want to view or edit to select it in the list then click on the **Download document** button. You will be shown two options: click on *Download* to just save the file on your computer or *Download and open* to save the file on your computer and open it for viewing or editing. A window will open for you to select the location to save the file on your computer. Browse to the folder you want to save it in then either double-click on the folder or click on it to select it then click on the **Open** button. The file will be saved in the location you chose. If you selected the *Download and open* option the file will also be opened for you to view or edit.

If you want any edits you make to the document to be saved to the quote, when you have finished editing, you must upload the edited version to the quote using the **Upload document** button. Don't forget or your edits will only exist on your computer, not on the quote! It is not necessary to change the document's name so that you don't overwrite the original, as mSupply will recognise that changes have been made, and will save it as a new version (and keep the old version too). The file's version number will appear in the *Version no* column. The **Show** drop down list above that column allows all versions to be displayed, or only the latest one.

Comments tab

This is used for adding comments from you or the supplier, things that need to be remembered or considered later.

The screenshot shows a window titled "Edit Quote" with a light gray background. At the top, it says "From supplier: ACME Pharma". Below that is a text input field labeled "Their reference:". There are three tabs: "Edit Quote", "Reference documents", and "Comments", with "Comments" being the active tab. The main area contains two large text input fields. The first is labeled "My Comment" and the second is labeled "Supplier comment". At the bottom right, there are two buttons: "OK & Next" and "OK".

[illegible]

Enter the details of the supplier's bid for each item in each row of sheet 1, starting at column I:

Column	Mandatory?	Title	Description
I	Mandatory	Offered pack size	The pack size offered by the supplier for this item
J	Mandatory	Offered price per pack	The price for a pack for this item
K	Mandatory	Currency	The three letter currency code of the price
L	Mandatory	Expiry Date	The expiry date of the stock being offered
M	Mandatory	Delivery time	The number of days between the closing date of the tender and delivery
N	Optional	Supplier item code	The code of the item in the supplier's item catalogue
O	Optional	Manufacturer name	The name of the manufacturer
P	Optional	Comments	Any remarks that the supplier wants to make about this line

If you add new manufacturers or currencies on sheet 1 they will be created for you during the import. You do not need to add them to sheets 2 and 3.

When complete, save the spreadsheet and **close it** (if you don't close it, mSupply will not be able to open and read it). then double-click on the supplier's name in the list to see the supplier's quotes window:

[illegible]

Click on the **Import tender** button, select the spreadsheet file and click on the **Open** button. mSupply will carry out the import and you will see the results in the table in the supplier's quotes window.

After the import, you can still manually edit any of the supplier's quotes by double-clicking on the individual lines, as described in the [Entering responses manually](#) section above.
