3.03. Opening the example data file

You will have two icons on your desktop - double-click the **mSupply** icon.

If you are opening mSupply for the first time, the program should automatically open the example data file.

The full path to the data file is displayed, along with other useful information by choosing *Menu>Help>About mSupply*.

If you have already been using mSupply and have another data file open, but would like to open the example data file for training, then you can use *Menu>File>Open data file...* to open the example data file. In Windows, by default the example data folder is stored at *c:/mSupply/database/*; navigate to the location and open the data file.

A login window is presented as mSupply opens the data file.

٩	Log-in – 🗆 🗙
Search users	
1. Click on your name in the user 1 (pass= user1) user2	list 2. Enter your password
user3	3. Choose store if available
	4. Choose login mode if available
	5. Check any messages
	Warning: example data file loaded. Log in, then use File > Open data file if you want to connect to a different data file. This data file is C:\mSupply\Database\mSupply.4DD
	6. Click the OK button to proceed
	V Quit OK

The user 1 (pass= "user1") entry should be highlighted, but if it is not, select this name.

Type user1 at 2. Enter your password.

The *Choose store if available* drop-down list will display **General**. The *Choose login mode if available* drop-down list will display **Store**. These should not be changed.

The message panel states that the example database will be used.

Click the OK button and the mSupply navigator screen appears.
