# 18.06. Mobile Dashboard set up (after v4.0)

August 2020: The instructions on this page are for configuring mSupply's legacy web dashboard and mSupply Mobile dashboards. mSupply's legacy web dashboard has been superseded by the mSupply Grafana web dashboard.

The following instruction are for setting up dashboards for mSupply versions 4.0 and later. For mSupply versions earlier than v4.0, the dashboard setup is accessed and configured via the mSupply Preferences menu, refer to Dashboard set up (prior to mSupply v4.0).

#### Before you set the dashboard up you must:

- know what ports are already in use on the server
- have an appropriate SSL Certificate set up.
- make sure your webserver is currently running.

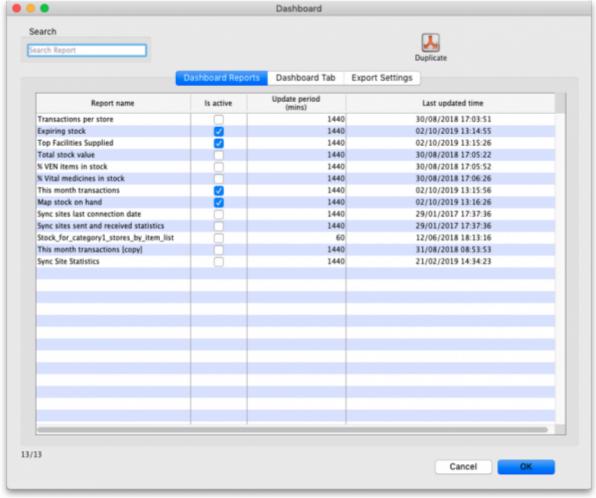

Sustainable Solutions can help with these.

## **Configure the dashboards**

1. On the **Admin** tab of the Navigator click on the **Dashboard** button:

2. This will show you a list of the available dashboard reports:

- 3. Tick the box in the **Is active** column for each report that you want generated.
- 4. Set the number of minutes in the **Update Period (mins)** column to set how often each of

these reports is generated. 1440 is one full day.

## **Available dashboard reports**

There are several built-in dashboard reports that everyone can use. The table below documents what they show and what properties can be edited:

If you would like help with adding one of these reports to your list, contact Sustainable Solutions on support@msupply.org.nz

Report	Method	Format	Parameters					
Expiring			monthsToInclude	befor repor	f this para	hat the (defaults	<u> </u>	
items for Store			storeCode	search for a single store matching this code  Looks for the dataElemen				
Shows a list of items, for a given store, which will expire within a specified number of months. v4.01	dashbaardDonortEvniringItomList	Table,	dataElement	Looks for the dataElem in aggregator here it to "AMC"				
	dashboardReportExpiringItemList	chart	customisation	allows for a client customisation: currently supports MAM for the MAM specific changes.				
			ven_category	V,E,N or E, N or V, Eetc will filter the VEN items. blank all visible items for the store are chosen			lf	
			chartType	1	bar, table. If blank, will default to table

Last update: 2020/08/14 06:05

Report	Method	Format	Parameters					
			ven_category	v or e or n if you want to include items that are Vital or Essential or Necessary				
Vital items in stock Shows a bar graph of the percentage of medicines of the chosen category in stock at each facility			user_field_4	TRUE if you want to include items with this field checked				
	dashboard_store_stock_percent	Bar chart		TRUE if you want to include items with this field checked Note that the labels for fields 4 and 7 may be different, as they are set up in the mSupply preferences (misc tab)				
	critic	critical_stock	TRUE if you want to include items with this field checked, false for all items					
			store_tags	entering healthcentre will only include stores with the "healthcentre" tag				

If you can't make a dashboard report that does what you want then please speak to us, it's usually a fairly simple matter for us to create one for you.

## **Editing dashboard reports**

Double-click a report in the list shown above and the following window will open:

- If there are any properties shown in the list, these can be edited to change what is displayed.
- To edit a property or value, click once to select the row, and then click again in the appropriate cell to edit it.
- To add or delete a row use the New line and Delete line(s) buttons at the top of the window.
- In the example shown in the screenshot above (a map report), the coordinates of two of the map corners and the item code of the item whose stocks will be shown on the map have been entered. Note that if you add extra properties to the default reports they'll be ignored.

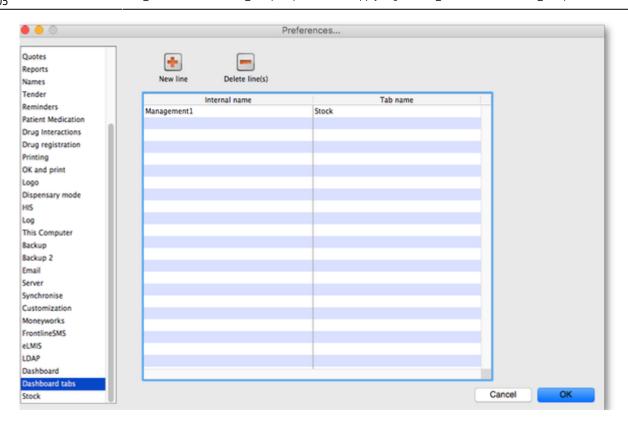

August 2020: The remaining instructions on this page are for configuring mSupply's legacy web dashboard. This may still work, but is no longer supported as it has been superseded by the mSupply Grafana web dashboard. The instructions are left here for historic reference only.

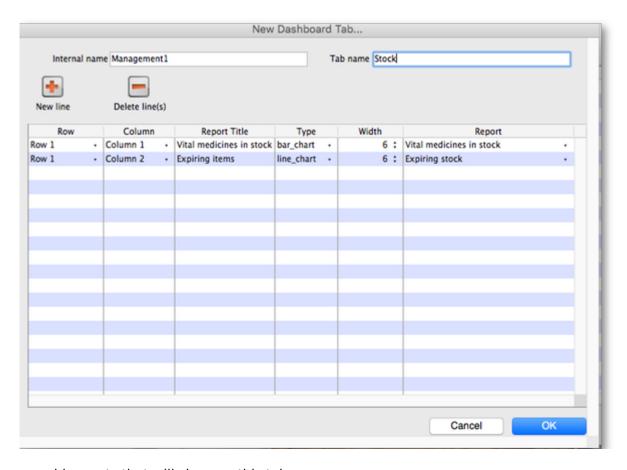

## **Dashboard tabs**

You set up Dashboard tabs which will display on your dashboard. Dashboard tabs are "containers" for one or more dashboard reports. To edit them go to *File > Preferences* and click on the *Dashboard tabs* tab on the left hand side:

Last update: 2020/08/14 06:05

To add a tab click the **Add** button. To edit a tab, double-click it. You will be shown a window for editing a dashboard tab:

Now you add reports that will show on this tab.

## **Understanding rows and columns**

Take this example dashboard tab:

- The tabs themselves occupy their own space on the left of the window- they aren't considered when laying out the dashboard
- The first row has two reports- each report takes up half the row. So for the first report:
  - Row 1, Col 1, width 12 ("12" means it takes up the full width of the cell it is in- "4" would mean it would take up 1/3 of the width)
- For the report at the top right:
  - Row 1, Col 2, width 12
- For the map

- Row 2, Col 1, width 12
- The next two reports are on the same row, but are divided into 5/12 and 7/12 of the width of the window, so we put them in the same cell but change the width settings:
  - Row 3, Col 1, width 5
  - Row 3. Col 1. width 7

### Adding a report to a dashboard tab

Click **New Line** to add a new report to the tab. Then edit the values in each column

- Row: The row it will be in
- **Column:** The column within the row- set to "1" if you don't have multiple reports on this row.
- **Report tite:** The title that will show in the Orange heading bar for the report. Note that the same report can display different information depending on the parameters you set for that report- hence the need for the ability to customise report names
- Type: You'll need to know the appropriate type for the report you're displaying. The options are
  - bar chart
  - o table
  - ∘ pie chart
  - o time series
  - o map
  - line chart
- **Width:** The fraction of the cell width in "twelfths" that this report will take up ("6" will make it take up half the cell width)
- **Report:** Choose the report name from the drop-down list of available reports

### Configure users to have access to dashboards

Once the tabs have been setup you have to choose which users will see which tabs. You do this in individual users' settings. For instructions on how to do this, see:

- Managing users > General tab > Users can: (Use the Dashboard permission)
- Managing users > Dashboard tab

Previous: 19.05. Web Dashboard | Next: 19.07. Online catalogue
